HOME PLANTINGS

1929

Griffing Nurseries
Beaumont, Texas

We Help You Plan Your Grounds

LANDSCAPE Gardening is a highly developed art. Through its application unsuspecting beauties of a property are brought into display. This is just as true of the small and modest property as it is of the larger, more pretentious. In order that you may benefit by proper planting we offer you an unequalled landscape service under the supervision of men whose good judgment and good taste founded on practical knowledge will assist you in the development of your home grounds so as to obtain immediate results and permanent satisfaction.

This involves a definite plan, which, if carefully worked out, will assure results that are highly profitable as well as gratifying from the standpoint of beauty. Property values definitely reflect the worth of attractive planting.

EVERGREENS FOR ALL-YEAR EFFECTS

Evergreen planting is one of the most satisfactory forms of landscape planting and highly successful. With evergreens you can secure immediate effects of exquisite and permanent beauty. Griffing offers only the best varieties for planting in the Southwest and there are enough varieties to satisfy the tastes of everyone.

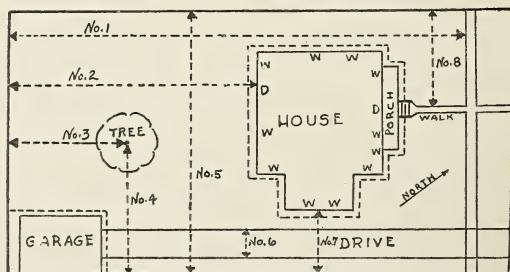

CONSULT US

We were among the first to offer help in Landscape

Gardening to residents of the Southwest and thousands of the most beautiful grounds in this section of the country have resulted from our services. We lead the field in this respect, and our services are at your command. No matter whether your work will be small or large, we are glad to advise on this subject.

SEND SKETCH OF YOUR GROUNDS

Measure the space available for your garden and draw a small sketch showing the house, garage or other buildings, and send to our Landscape Department. We will offer some valuable suggestions which you can easily carry out. Don't worry too much about the cost, for you can, if necessary, gradually acquire the proper shrubs as money is available. Or if you would rather have us handle all details, we will be glad to arrange to do this for you if you will simply write and state your requirements. In any case, may we suggest that you let us hear from you early in the season.

This is the way to make a sketch of your homesite

"Building for Tomorrow"

Nearly forty years ago we entered the nursery business here in this glorious Southland and started "building for tomorrow."

Thru the years it has been an ideal and a policy with us to "always build for tomorrow"—to furnish a superior quality of the best varieties of nursery stock—to render a service worth while—to maintain policies that made our customers of today, our customers of tomorrow.

Such building has paid us well. Today there is no nursery in this Southland that has a better reputation for square business dealing and high quality stock—none within hundreds of miles as large or with as complete a stock.

We have prospered. "Building for tomorrow" has paid us well and we appreciate the patronage and loyalty of our customers who have, thru the years, made our success possible.

Just as it has paid us to "build for tomorrow" so will the same policy help you—the planter of nursery stock, whether it be an orchard or landscape planting, is building for tomorrow and it will pay to plant only the best your money can buy because tomorrow's results depend on the foundation you build today.

"Building for tomorrow," after all these years, has become a habit, a routine, with us and today, as always, we strive to give you only the best that we may merit your patronage today and tomorrow.

Sincerely,

Griffing Nurseries

INSURE YOUR TREES AND SHRUBS

A great many people want the nurserymen to stand all losses, whether due to climatic conditions, plantings, or after care. For such customers we offer the following insurance proposition:

Upon payment of full purchase price, plus twenty per cent of same, we will insure the growth of such stock as we deliver against loss from natural causes for one year. Purchaser is to notify us promptly as to losses claimed so we can investigate and issue proper credits.

Take advantage of this insurance. See application blank on order sheet.

INSURE—TAKE NO CHANCES

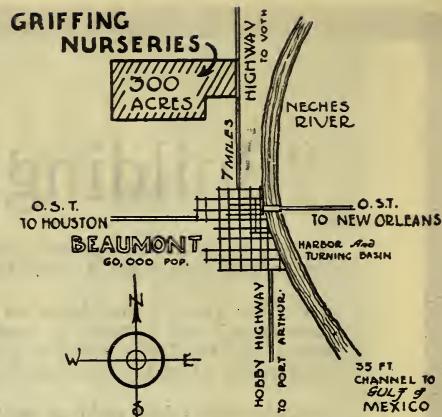

An INVITATION to VISIT Our NURSERIES

Located in the Suburbs of Beaumont.

You will find it a pleasure to visit our big Nurseries. A drive through fragrant woods over the concrete highway No. 40 and No. S, or Voth road, brings our friends to the Nursery at Rosedale. After the visitor crosses the irrigation canal, he will recognize the Nursery by the extensive palm and orange groves bordering the highway. The acres of thriving conifers and broadleaf plants beyond are barely visible. A 4½ mile drive thru our nursery is always open to visitors.

LOCATION

Our Nursery Plant is in a particularly favorable location. Isolated from other plantings and free from injurious insect pests and diseases.

HOW TO ORDER

DESCRIPTIONS

COMMON NAMES: Always alert to improve our service and methods, we adopted the names approved by the American Joint Committee and have taken great care in making the technical nomenclature accurate. For the information and convenience of our customers, we use the common names and show other commonly used names, listing all generally known varieties under the various names.

GRADING BY QUALITY: According to American Nurserymen's Standardized System; X signifies good, plantable quality, XX indicates heavy grade; XXX indicates very heavy specimens. Prices in this catalog are based on XX quality stock. For XXX specimens add 20% to these prices.

All Griffing's Plants listed (B&B) and (NB).
(B&B) Balled and Burlapped.
(NB) Bare Rooted.

INSTRUCTIONS: Patrons will oblige us and avoid possible errors, omissions and misunderstandings, by using the order blank, and observing the following suggestions and terms of sale. More order blanks will

be cheerfully furnished upon request. Indicate size order by writing size in figures. Extend or carry out prices for each item.

TERMS OF PAYMENT: Cash with order or before shipment of goods.

RESERVE ORDERS: Must be accompanied by 25% of the amount of order, to insure us in reserving goods. We cannot accept C. O. D. orders unless 25% of amount accompanies orders.

PACKING CHARGES FREE: Prices in this catalog cover goods packed and delivered in good condition to the forwarding companies, purchaser assuming all cost and risk of transportation.

PARCEL POST SHIPMENTS: Will be prepaid on small bare-rooted stock by adding one-fourth of the cost of order, stock to be pruned before shipping.

WARNING: Many nurseries and dealers buy and sell our stock. Trees or plants sold to nurseries or dealers must be sold by them on their own responsibility, except when we ship direct.

GUARANTEE

We guarantee all stock to be in good condition when it leaves our nursery, but assume no responsibility for damage done in transit; but we will help you to be reimbursed by the transportation companies. Should there be any shortage or reason for complaints we must be notified upon receipt of goods, otherwise we cannot entertain claims.

While we exercise the greatest care to have all trees, shrubs and plants sold by us true to name and free from disease, and hold ourselves prepared to replace, on proper proof, all that may prove to be otherwise, we do not give any warranty, expressed or implied, with respect to them. Any and all such goods are sold upon the express condition and understanding that in case any of them prove to be untrue to name, unhealthy or otherwise defective, we shall not be held responsible for a greater amount than the original price of the goods.

Griffing Nurseries

GRIFFING'S BALLING SOIL

A Feature About Griffing's B&B Nursery Stock You Must Not Overlook

Removing the Root System
Without Shock.

No Roots Exposed to the Air.
A solid compact ball.

The Dirt Can't Break Away
From the Roots.

They Never Break Out of Our Plastic Black Waxy Soil Even Tho No Burlap Used.

WHAT IS B. & B.? MOVING A TREE IN THE DIRT IT GREW IN!

B. & B. has upset all traditional customs about time of planting, size that can be planted, and has eliminated years from planting time to the day when the effect is really visible.

HOW BALLING AND BURLAPPING (B. & B.) IS DONE

Look at the photographs showing the procedure of digging, lifting from the hole, and casing with strong burlap. The feeding roots are in the ball. The moisture and soil is held intact. No shock results from digging. Plants start growth more rapidly. The loss among balled plants is negligible and with proper care and attention after planting in the way of water and cultivation, there is no necessity for losing a single plant.

We do not spade them out and tie burlap around the loosened soil, but the soil is solid, never cracked.

All Palms, Evergreens, Conifers, Shade Trees, and Flowering Shrubs are greatly benefited by handling B. & B. Give your plants a fair deal.

THE ORIGIN OF B. & B.

We long ago saw the increasing demand for immediate effects in planting, for a system whereby plants could be moved at any season, for a means of transplanting plants which are moved bare-rooted with high mortality, for some plan by which the shock of transplanting could be reduced and in many instances eliminated, and a method which would expedite planting, minimize care, and insure growth.

The system was found in B. & B. The disadvantage was that the majority of soils could not be handled in such a manner.

WE STARTED OUR SEARCH AND IDEAL SOILS WERE FOUND

where we located our Rosedale Nursery. Skilled men can now dig balls there in any size and securely B. &

B. for any amount of handling, long distance shipping, etc., without injuring the plants or crumbling the balls. Experimenting for nearly half a century, combined with Nature's aid in soils advanced us to a position as leaders in the handling of B. & B. plants because of Griffing's plastic, black waxy, balling soil.

ADVANTAGES OF B. & B.

We grow our young stock in good upland soil and transplant them to the heavy Griffing Balling Soil, pruning the roots in the process. This makes compact feeding systems and the majority of the roots of the fine fibrous type which mean so much to the plant are left in the ball when they are dug for shipment. They are undisturbed. Naturally, they grow better than when lifted bare and naked, free of dirt and moisture. No amount of packing offsets the instant exposure suffered somewhere in the handling of barerooted plants. Balling is the Safe Method, the Sure Method, the Best Method.

EASY TO PLANT

In planting B. & B. trees you need not put your hands in the dirt to arrange the roots. Simply set the ball in the hole, the shoulder two inches above ground level, never removing the burlap. No trimming necessary. Then start spading from side wall of the hole, deeply and thoroughly, out to 3 feet from the tree. Then use loose dirt taken out when the hole was dug as top dressing. Have the nozzle of the hose thrust under the ball during this procedure to thoroughly soak the ground.

THE RESULT

Years are eliminated while waiting for your plants to grow. Large plants can be safely moved. Plants which in former years were hard to make grow after transplanting can now be handled with all safety. Immediate effects from your plantings are had, most plants being handled B. & B. without pruning or the loss of many leaves. Bare-rooted they would be stripped and pruned and their beauty lost. There is no comparison in the two methods. Use B. & B. trees and get results.

CAUTION: Never lift small B. & B. stock by the top or branches. Lift the ball itself by grasping it with both hands, so as not to loosen roots in the ball.

Coniferous Evergreens

*The Aristocrats of
the Garden*

CONIFEROUS EVERGREENS are the tall cone-shaped evergreen trees. They include many varieties, among which are the Arborvitae, Cypresses, Junipers, Pines, etc.

The special advantage in these evergreens lies in the fact that they are suitable for most any space and adaptable to almost any shape or size of building.

They keep their beauty the year around.

The conifers should always be handled B & B. And when handled Balled the Griffing way, grow off with universally pleasing results.

ALL Conifers and Broadleaf Evergreens are grown from grafts or cuttings, which will make them true to name and type unless otherwise stated.

Arborvitae (Biota)

Thuja Orientalis

Many people prefer Arborvitae on account of their formal, symmetrical shapes and as they are such widely varying types, even as to shape and color, they make groupings for various locations so that they are indispensable as there is some kind suitable for every landscape use.

There are two types of Arborvitae known as Occidental and Oriental. The Occidentals are generally not suited for Southern states, while the Oriental or Chinese types all do well in the South. The Oriental type is also classed as (Biota) which is now unapproved.

BAKERS PYRAMID (Biota) T. or. *pyramidalis*

A pyramidal type which was introduced by Baker Brothers and listed as Bakers Hybrid by them. A pyramidal type, vigorous grower, light yellowish-green coloring with distinctive appearance. This variety is well known.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$ 8.00	\$7.00
B&B 4 to 5 ft.....	6.50	5.75
B&B 3 to 4 ft.....	5.00	4.25
B&B 7 to 8 ft.....	12.50	Specimens.
B&B 6 to 7 ft.....	10.00	Specimens.

BERCKMAN'S GOLDEN (Biota) T. or. *aurea nana*

Often called Dwarf Evergolden. Compact and bushy; rich golden tipped foliage. Always beautiful from the little plant until maturity; almost globular as it gets older. Foliage flattened perpendicularly and each branch close against the others, giving an unusually beautiful appearance and making the plant very compact. You will like it as a specimen or in groups. It adds quality to plantings of broadleaf plants.

Height	Each	Ea. per 10
B&B 2 to 3 ft.....	\$ 4.25	\$3.50
B&B 18 to 24 in.....	3.00	2.40
B&B 12 to 18 in.....	2.00	1.50
B&B 4 to 5 ft.....	10.00	Specimens.
B&B 3 to 4 ft.....	7.50	Specimens.

BEVERLY GOLDEN (Biota)

T. or. *beverleyensis*
Tall, columnar slender effect; the tallest and stateliest of the Chinese Arborvitae; foliage which covers the trunk well, is flattened; bright green overcast with golden yellow. This variety is unequalled for a vertical line among shrubbery or in formal plantings. Especially when the tree gets older.

Height	Each	Ea. per 10
B&B 7 to 8 ft.....	\$12.00	\$10.00
B&B 6 to 7 ft.....	10.00	8.00
B&B 5 to 6 ft.....	9.00	7.50
B&B 4 to 5 ft.....	8.00	6.50
B&B 8 to 10 ft.....	18.00	Specimens.

BONITA (Biota)

(Locke's Dwarf Globe)

A beautiful Globe, broad-shaped Arborvitae of unequalled richness in color and perfection of form. Rich green color, half globe shape. The most attractive and useful of all varieties we grow. Can be planted in most prominent locations, as it makes uniformly perfect growth. Slow growth makes it desirable in locations where others would over-grow. Ideal for the finest landscape plantings and most beautiful grounds.

Height	Each	Ea. per 10
B&B 2 to 2½ ft.....	\$5.00	\$4.00
B&B 18 to 24 in.....	4.00	3.20
B&B 15 to 18 in.....	3.40	2.80
B&B 12 to 15 in.....	2.70	2.20
B&B 4 to 5 ft.....	10.00	Specimens.
B&B 3 to 4 ft.....	7.50	Specimens.

DAILY DWARF (Biota)

(Mayhew Golden) T. or. *Daily nana*

Upright habit of growth, with tips of the branches a golden color in Spring.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$5.00	\$4.25
B&B 2 to 3 ft.....	3.75	3.00
B&B 18 to 24 in.....	2.50	2.00

EXCELSA (Biota)

T. or. *excelsa*

Foliage soft and lacy, light green in color. A symmetrical grower.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$6.00	\$4.50
B&B 3½ to 4 ft.....	5.00	4.00
B&B 3 to 3½ ft.....	4.00	3.50

NEW AND UNNAMED ARBORVITAE

PYRAMIDAL (Biota) T. or. pyramidalis

For several years we have been experimenting with new pyramidal form of Arborvitae, and this year are offering them to the trade in an assortment of varieties. All have been propagated from cuttings and are genuine, compact pyramids. They vary in shades of color from a dark blue green to a light yellowish green. Some pyramids are bushy, while others are very slender. Customers who have visited our Nurseries are enthusiastic over our general collection, and tell us we have the choicest assortment of unnamed varieties they have ever seen. In order to thin out, we offer a limited quantity as follows:

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$7.50	\$6.00
B&B 4 to 5 ft.....	4.50	3.40
B&B 3 to 4 ft.....	3.50	2.80
B&B 6 to 8 ft.....	9.00	Specimens.

Your order will be filled with assorted varieties unless we are instructed otherwise.

Block of 18 months old Berckmans Golden

COMPACT GREEN (Biota)

T. or. compacta

This is a variety the Griffing Brothers originated in Florida which has a very dark appearance. Good grower, and fills out close to the ground and keeps a uniform columnar appearance. Much preferred by Landscapers.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$6.75	\$5.75
B&B 3 to 4 ft.....	5.00	4.25
B&B 2 to 3 ft.....	3.50	2.75
B&B 5 to 6 ft.....	9.00	Specimens.

GOLDSPIRE (Biota)

T. or. aurea conspicua

Originated by P. J. Berckmans Company; of compact, erect and symmetrical habit. Foliage intense gold; some of its branches being of a solid metallic tint, others suffused with green. As its name implies, it is the most conspicuous: easily grown; and has stood perfectly in the East and West 20 degrees below zero

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$11.00	\$9.75
B&B 4 to 5 ft.....	8.75	7.75
B&B 3 to 4 ft.....	7.50	6.50

GRIFFINGS DWARF GREEN (Biota)

T. or. nana

This is as good a dwarf Arborvitae as the Berckmans Golden, only it has a light green appearance instead of the yellowish coloring of the Berckmans Golden. It remains dwarf; plants in our nursery the same age remain smaller than Berckmans, and not one-third as fast growing as the Bakers. It is very neat; fine plush foliage; and has a unique pointed appearance, although compact: fills out close to the ground.

Height	Each	Ea. per 10
B&B 3½ to 4 ft.....	\$6.80	\$5.50
B&B 3 to 3½ ft.....	5.50	4.50
B&B 2½ to 3 ft.....	5.00	4.00
B&B 4 to 5 ft.....	8.00	Specimens.

HUDGINS (Biota)

T. or. hudginse

Originated by Hudgins of Georgia. A very compact, bluish-green, feathery foliage, branches close to the ground. Foliage open enough to allow sunlight and air to penetrate, so it is green to the center, thus making one of the choicest compact blue-green, arborvitae.

Height	Each	Ea. per 10
B&B 2½ to 3 ft.....	\$3.00	\$2.50
B&B 2 to 2½ ft.....	2.50	2.00
B&B 18 to 24 in.....	2.10	1.80
B&B 12 to 18 in.....	1.80	1.50

ROSEDALE (Biota)

T. or. rosedale

A neat compact little shrub of rounded outline. This Arborvitae is different from any other in the fineness of its foliage. It can almost be described as feathery. Blush-gray foliage; making a very striking plant. Perfect uniform shape.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$3.00	\$2.60
B&B 2 to 3 ft.....	2.50	2.00
B&B 18 to 24 in.....	2.00	1.50
B&B 12 to 18 in.....	1.60	1.10
NB 18 to 24 in.....	1.20	.80

RAMSEY (Biota)

T. or. Ramsey

A tall, fast growing pyramid, with thread-like foliage, yellowish green in color. A tree of exceptional merit for the Southern States. Withstands drouth and heat.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$9.00	\$7.50
B&B 4 to 5 ft.....	6.50	5.00
B&B 6 to 8 ft.....	15.00	Specimens.

TEXAS BLUE (Biota)

T. or. texana glauca

A tall, fast growing tree with loose, blue green foliage. Originated by Baker Bros., Ft. Worth, Texas, for which they describe it as a tall growing, feathery glaucous foliage. Rapid open grower of the Chinese Arborvitae type.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$6.00	\$4.50
B&B 4 to 5 ft.....	5.00	3.50

YELLOW COLUMN (Biota)

T. or. elegantissima

Golden Pyramidal Arborvitae; tall, slender, tapering gracefully from a comparatively broad base to a sharply pointed tip. A rare and very fine plant. The green foliage is tipped with an attractive golden bronze during most of the year, turning bright yellow in the Spring.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$7.00	\$6.00
B&B 3 to 4 ft.....	5.75	4.75
B&B 2 to 3 ft.....	4.00	3.50

CHEAP ARBORVITAE

We do not recommend seedling Arborvitae however some good plantings can be made from them.

We have classified seedlings as per the five listings below. As they are now grown in the same row they are all listed together. The seedlings are real bargains especially dwarf type which often comes out better than any named type (they will not match up like cutting grown varieties).

The sheared types are more compact and make thick specimens. The unsheared ones are open type and do not respond to shearing; therefore are good for wind-break or for planting. The prices of these are so cheap they can be used for various plantings.

The yellow type is open selected to equal many varieties such as Aurea Conspicua, Berckmans Golden, etc.

SEEDLING GREEN UNSHEARED (Biota) T. orientalis

These are selected from same lot of seedlings as the sheared ones are taken from, these being more open growing and only suitable for Wind-breaks or hedge planting. For hedge planting they can be pruned the same as Privets and make a good permanent hedge, free from White Fly or nematode.

Height	Each	Ea. per 10
B&B 6 to 8 ft.....	\$3.50	\$2.75
B&B 5 to 6 ft.....	2.50	2.00
B&B 4 to 5 ft.....	2.00	1.60
B&B 3 to 4 ft.....	1.60	1.20
NB 4 to 5 ft.....	1.50	1.00
NB 3 to 4 ft.....	1.20	.80
NB 2 to 3 ft.....	.80	.60

B E A U M O N T , T E X A S

ARBORVITAE—Continued

SEEDLING GREEN SHEARED (*Biota*) *T. orientalis*
 These vary in color and shape. Those we list "sheared," are the most compact growing ones out of these seedlings and where there are many beautiful specimens they cannot be matched up as cutting grown named varieties.

Height	Each	Ea. per 10
B&B 6 to 8 ft.....	\$4.50	\$3.75
B&B 5 to 6 ft.....	3.60	3.00
B&B 4 to 5 ft.....	2.00	1.75
B&B 3 to 4 ft.....	1.75	1.50

SEEDLING GREEN DWARF PYRAMID (*Biota*) *T. or. nana*

Comprising selected strains of dwarf pyramidal or upright types. Because they are seedlings they may vary both in shape and color.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$3.00	\$2.75
B&B 3 to 4 ft.....	2.50	2.25
B&B 2 to 3 ft.....	2.00	1.75
B&B 18 to 24 in.....	1.75	1.25

SEEDLING GREEN DWARF GLOBE (*Biota*) *T. or. nana*

From the above seedlings we have selected the dwarf globe shaped plants. Because they are seedlings they may vary both in shape and color.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$3.00	\$2.50
B&B 2 to 3 ft.....	2.50	2.00
B&B 18 to 24 in.....	2.00	1.60
B&B 12 to 18 in.....	1.50	1.20

SEEDLING YELLOW (Biota) *T. or. elegantissima*

They resemble *elegantissima*. A splendid assortment of Erecta golden seedlings, varying both in shape and color.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$8.50	\$7.00
B&B 4 to 5 ft.....	6.00	5.00
B&B 3 to 4 ft.....	5.00	4.00
B&B 2 to 3 ft.....	4.00	3.00

SEEDLING YELLOW DWARF PYRAMID (*Biota*) *T. or. nana*

Beautiful selected strains of dwarf golden pyramidal or compact types. They vary both in shape and color.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$3.50	\$3.00
B&B 2 to 3 ft.....	3.00	2.50
B&B 18 to 24 in.....	2.50	2.00

SEEDLING YELLOW DWARF GLOBE (*Biota*) *T. or. nana*

From the above golden seedlings we have segregated the dwarf golden globes. Because they are seedlings they vary in shape and color.

Height	Each	Ea. per 10
B&B 2 to 3 ft.....	\$5.00	\$4.00
B&B 18 to 24 in.....	4.50	3.50
B&B 15 to 18 in.....	4.00	3.00
B&B 12 to 15 in.....	3.00	2.50

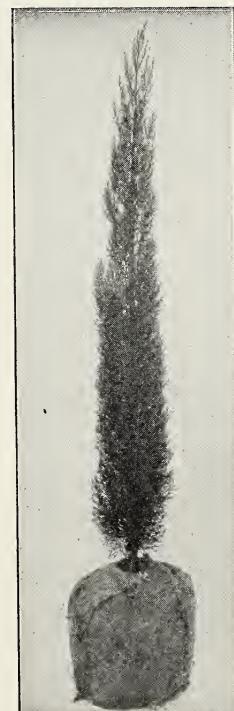

Cypress and Cedars

Few trees are more permanent than the varieties of Cypress and Cedars. The Cypress surpass all others in rapidity of growth and lends a dignity to the garden giving interest, variety and accent to the plantings unequalled by any other evergreen. The stately Cedars are indispensable for use in groups or specimen plantings.

ROYAL ITALIAN CYPRESS *C. sempervirens fastigiata*

This is a tall, slender evergreen, straight and columnar. Its dark green shaft rising above other shrubbery gives a varied sky line. It is equally at home in small grounds or large ones, with the cottage or the larger house. During a long life, it reaches great height. This is the tree which so many American tourists in Italy have become enthusiastic about.

Our plants are propagated from extra compact, narrow trees of vigorous growth, and the quantity we grow makes it possible for you to secure matched trees, an important item when they are to be used at entrances, corners, along porch columns or in a row back of lower shrubs.

Royal Italian Cypress

Height	Each	Ea. per 10
B&B 10 to 12 ft.....	\$12.25	\$10.00
B&B 8 to 10 ft.....	9.75	7.75
B&B 6 to 8 ft.....	8.25	6.75
B&B 5 to 6 ft.....	6.75	5.50
B&B 4 to 5 ft.....	5.00	4.00
B&B 12 to 15 ft.....	18.00	Specimens.

SPREADING ITALIAN CYPRESS *C. sempervirens* (Seedlings) (Horizontal Cypress)

The spreading type is rich in appearance and differs in its horizontal method of growth. Branches parallel with the ground. Foliage similar to the Italian with vertical branches, but in this type the branches are

horizontal, forming a cone shaped tree of great beauty. One of the best for individual specimens.

Height	Each	Ea. per 10
B&B 6 to 8 ft.....	\$6.75	\$5.25
B&B 5 to 6 ft.....	5.25	4.50
B&B 2 to 3 ft.....	2.25	1.75
B&B 12 to 15 ft.....	14.75	Specimens.
B&B 10 to 12 ft.....	12.25	Specimens.

ITALIAN CYPRESS (Seedling) *C. sempervirens*

Similar in all respects to those described above. This uniform, selected, narrow, column type has been developed from imported seedlings. Highly desirable because of their dark green foliage.

Height	Each	Ea. per 10
B&B 10 to 12 ft.....	\$10.00	\$8.75
B&B 8 to 10 ft.....	8.25	7.00
B&B 6 to 8 ft.....	6.75	5.25
B&B 5 to 6 ft.....	5.25	4.50
B&B 2 to 3 ft.....	2.25	1.75
B&B 12 to 15 ft.....	14.75	Specimens.

DEODAR CEDAR *C. deodara* (Himalayan Cedar)

Beautiful, pyramidal, large evergreen growing from broad base to point at tip. Branching horizontal, foliage silver or bluish. A striking beauty on the lawn as specimen or in groups. Highest quality. Adds grace and beauty to the finest grounds. Perfectly adapted to the South, although a native of Asia, the Indian Cedar of Kipling's writings.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$12.50	\$11.00
B&B 4 to 5 ft.....	9.75	7.75
B&B 3 to 4 ft.....	6.75	5.50
B&B 2 to 3 ft.....	4.50	3.75
B&B 8 to 10 ft.....	21.50	Specimens.
B&B 6 to 8 ft.....	16.75	Specimens.

RED CEDAR *Juniperus Virginiana*

An attractive well known tree pyramidal shape. Covered with silvery blue berries in season. Good in background or for shade. These vary in both color and shape.

Height	Each	Ea. per 10
B&B 10 to 12 ft.....	\$14.00	\$13.25
B&B 8 to 10 ft.....	11.00	10.25
B&B 6 to 8 ft.....	8.50	7.25

B&B 16 to 20 ft.....	40.00	Specimens.
B&B 12 to 16 ft.....	24.00	Specimens.

BHUTAN CYPRESS *C. torulosa majestica*

A tall vigorous pyramidal tree, forming a dense, broad pyramid with slender drooping branchlets and a yellowish green.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$6.25	\$5.00
B&B 2 to 3 ft.....	4.75	3.75

The Junipers

The Junipers comprise a large and varied group of small or dwarf trees, including trailing forms, which make a spreading mat of green on the ground; wide spreading, semi-prostrate varieties with horizontal branches; dwarf pyramidal or columnar forms and good sized trees. The Juniper are long lived, hardy, and of easy growth.

Prostrate Canada Juniper

COMMON JUNIPER

(Armstrong's semi-prostrate)

A bushy upright tree with many branches and soft grayish-green foliage, forming a broad dense head.

Spread	Each	Ea. per 10
B&B 4 to 5 ft.....	\$4.50	\$3.50
B&B 3 to 4 ft.....	3.50	3.00

IRISH JUNIPER

J. communis hibernica
A somewhat fine leafed, bluish Juniper. It is the Irish Juniper of the north, but takes a spreading habit in the south.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$5.00	\$4.00
B&B 3 to 4 ft.....	3.50	2.80
B&B 2 to 3 ft.....	2.70	2.20

MASCULA JUNIPER*J. sinense mascula*

A form of Japanese Juniper but more erect and compact. A handsome pyramidal tree with bluish gray green foliage.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$6.00	\$5.00
B&B 2 to 3 ft.....	5.00	4.00

PFTZER JUNIPER*J. chinensis pfitzeriana*

The handsomest of the Juniper varieties in cultivation. Has wide-spread horizontal branches and forms an immense flat, irregular head of plush green foliage. The Pfitzer is the most satisfactory of the low spreading or prostrate type of Juniper that we recommend for the South. Unusually beautiful in its distinctive, grayish color and irregular, flat spreading growth. For the terrace planting, prominent low groups about foundations, and as specimens it cannot be excelled.

Spread	Each	Ea. per 10
B&B 4 to 5 ft.....	\$6.00	\$5.00
B&B 3 to 4 ft.....	5.20	4.50
B&B 2 to 3 ft.....	4.00	3.00
B&B 18 to 24 in.....	2.75	2.25
B&B 4 to 6 ft.....	7.50	Specimens.

PROSTRATE CANADA JUNIPER*J. com. canadensis*

(*J. com. depressa*)
Formerly known as "Canadensis." Of unusual form, having no main stem, it branches in all directions with long, heavily foliated branches of graceful curves. Silvery blue color.

Spread	Each	Ea. per 10
B&B 3 to 4 ft.....	\$5.00	\$4.00
B&B 2 to 3 ft.....	4.00	3.00
B&B 18 to 24 in.....	3.20	2.70
B&B 4 to 5 ft.....	6.75	Specimens.

SAVIN JUNIPER*(Horizontalis) J. sabina*

This is a vase shape spreading type, hardy, of a rich green color.

Spread	Each	Ea. per 10
B&B 2 to 3 ft.....	\$4.50	\$3.50
B&B 18 to 24 in.....	3.50	2.75
B&B 12 to 18 in.....	2.75	2.20

SPINY GREEK JUNIPER*J. excelsa stricta*

Dwarf compact. A very ornamental tree decidedly conical in form, well branched and densely clothed with grayish-green, glaucous foliage. A distinct species of great beauty. Excellent for conifer groups, for specimens or for tubs and urns. Grows slowly.

Height	Each	Ea. per 10
B&B 3 to 3½ ft.....	\$6.00	\$5.00
B&B 2 to 3 ft.....	5.00	4.00
B&B 18 to 24 in.....	3.75	3.00
B&B 12 to 18 in.....	2.75	2.25
B&B 9 to 12 in.....	1.75	1.60
B&B 3½ to 4 ft.....	7.00	Specimens.

SYLVESTER JUNIPER*J. sinense femina*

Growth unique, siding effect, sprang upright habit; foliage rather unusual feathery effect; grayish in centers of plants; light green; hardy and easy to grow. This Juniper we consider the best of any of the upright growing ones and fills a place in plantings that no other conifer can if properly placed. Thrives in wet and shady places.

	Height	Each	Ea. per 10
B&B	4 to 5 ft.....	\$8.75	\$7.50
B&B	3 to 4 ft.....	6.50	5.50
B&B	2 to 3 ft.....	5.00	4.00
B&B	6 to 8 ft.....	17.25	Specimens.
B&B	5 to 6 ft.....	12.75	Specimens.

Pine*Pinus*

ITALIAN STONE PINE *P. pinea*
A beautiful compact, symmetrical tree when young. Old trees develop a broad umbrella shaped head.

	Height	Each	Ea. per 10
B&B	18 to 24 in.....	\$3.75	\$2.75
B&B	12 to 18 in.....	2.75	2.25

YELLOW LONGLEAF PINE *P. palustris*
A dense round headed shrub; bright green in color and a rapid grower.

	Height	Each	Ea. per 10
B&B	6 to 8 ft.....	\$12.00	Specimens.
B&B	5 to 6 ft.....	9.75	Specimens.

Podocarpus

JAPANESE YEW *P. macrophylla*
Of recent introduction. Grows equally well in sun or shade, and is not particular as to soils. Excellent for seaside plantings. A small bushy tree with long slender leaves, dark green in color; of easy culture and a rapid grower.

	Height	Each	Ea. per 10
B&B	5 to 6 ft.....	\$12.50	\$10.25
B&B	4 to 5 ft.....	10.00	8.50

Retinospora*Chamaecyparis*

SEIBALD CYPRESS, As known in the East *R. squarrosa seiboldii*
ANDELY RETINOSPORA, As known in California and sold by us for two years. *R. leptoclada*

A dense round headed shrub; bright green in color in summer, changes to steely bronze color in winter. Because of this unique color change and its round symmetrical shape it is a very attractive evergreen coniferous shrub.

	Height	Each	Ea. per 10
B&B	2½ to 3 ft.....	\$3.75	\$3.00
B&B	2 to 2½ ft.....	2.75	2.25
B&B	18 to 24 in.....	2.50	2.00
B&B	15 to 18 in.....	2.00	1.75
B&B	12 to 15 in.....	1.60	1.10

COLUMN RETINOSPORA *R. decussata*
A tall pyramidal tree, with soft gray-green foliage.

	Height	Each	Ea. per 10
B&B	4 to 5 ft.....	\$4.50	\$3.50
B&B	3 to 4 ft.....	3.75	2.25

Part of a block of 20,000 Pfizer Juniper

Broadleaf Evergreens Ideal for Foundation Planting

"Broadleaf Evergreens" derive their name from the flat leaf. They are distinguished from the conifers also by their switchy branching appearance.

They are particularly suitable for foundation planting, serving to hide undesirable and ugly places in the foundation of the house.

Unlike other plants and flowers which are pretty only during certain seasons of the year and have to be replaced annually, these Broadleaf Evergreens look attractive at all times.

Broadleaf evergreens have received our close attention for years and many highly desirable older types have been brought to the front and many others introduced by our efforts.

Many distinguished landscape artists have often remarked after seeing our choice collection, "If we had these beautiful Broadleaf Evergreens we should want nothing better to make complete plantings with. Such a variety."

The landscape artist only needs to be familiar with this valuable group to carry out his planting ideas for year round effects. Many of these varieties are hardier farther North than they are usually supposed to be.

Cape Jasmine.

Abelia Glossy

Abelia Grandiflora

Hardy, free blooming shrub with shiny, purplish, evergreen leaves. Bears in clusters a profusion of tubular shaped flowers about one inch long, white inside. Fragrant blooms last all summer. Very desirable for banking and foundation planting. We take the extra expense to hand prune them frequently during the growing season to produce compact uniform plants.

	Height	Each	Ea. per 10

B&B	4 to 5 ft.....	4.00	Specimens.

Camphor

Cinnamomum Camphora

Maintains a pyramidal compact shape, bushy when allowed to branch itself. Few trees maintain such marvelous color changes. The new growth is a wine or bronze color before it develops. The leaves have a rich green color through the summer and in the fall some of the older leaves are constantly acquiring a bright vermillion color, similar to the Sumac. Occasional trees can be trimmed for lawn or street purposes. Very suitable for hedge and windbreaks or screens. Does not like alkali soils.

NOTICE

If you do not find the Stock you want in this list, please write us, as we may be able to supply you. New stock is constantly going through our propagating department and in some varieties we have insufficient quantities to warrant listing.

BROADLEAF EVERGREENS—Continued

Cape Jasmine

Gardenia

An old Southern favorite shrub with attractive glossy green leaves and masses of waxy white blossoms, very fragrant. Cut flowers are exquisite. Cape Jasmines grow outside in the South, except on land that has excess lime or alkali. Blossoms highly valued in the North where it is known as Gardenia, to which romantic authors have referred so frequently.

DWARF CAPE JASMINE*G. radicans*

Low growing shrubs with attractive glossy green leaves, and waxy, white blossoms. Very fragrant.

Spread	Each	Ea. per 10
B&B 18 to 24 in.....	\$2.70	\$2.20
B&B 15 to 18 in.....	2.20	1.80
B&B 12 to 15 in.....	1.80	1.50

FLORIDA CAPE JASMINE*G. grandiflora*

Old Southern favorite with glossy leaves and masses of waxy white blossoms, very fragrant. Attains excellent height for foundation planting, massing, and for lawn specimens. Is one of the few heavy bloomers that give year around attractiveness. Cut flowers are exquisite. Masses of Cape Jasmine along property lines and for borders are always beautiful and their growth is so uniform that very striking informal hedges may be grown of Cape Jasmines. A remarkably beautiful planting, summer and winter. The characteristic plant of the South. Blossoms highly valued in the North where it is known as the Gardenia to which romantic authors have referred so frequently.

Griffing's Balled Trees and Shrubs, balled with Griffing's Balling Soil are as nearly sure to live as is possible.

From left to right: Griffing's Waxleaf, Nandina Domestica, Cotoneaster, Silverleaf, Upright Waxleaf, Feijoa, Hypericum.

Cherry Laurel B&B with Griffings Balling Soil will grow

*Cherry Laurel**Laurocerasus caroliniana*

Often Called "Wild Peach" and "Southern Laurel." One of the most beautiful broadleaf evergreens. Glistening green foliage, of medium shade, upright growth, attaining considerable height. Can be shaped to any desired form and kept at any height. Always beautiful, the white plum-like blossoms of the Cherry Laurel make it highly desirable for spring effects. No recommendation can be too high for these beautiful plants.

BROADLEAF EVERGREENS—Continued

Reading from left to right: Oleander, Abella, Crape Myrtle, Coral Berry, Amur Privet, Nandina, Bigberry Ligustrum, and Pittosporum.

Elaeagnus**Elaeagnus**

The Elaeagnus group contains a number of fine Evergreen Shrubs. The varieties which we offer are very desirable types and should be planted more extensively. The growth is very striking with contrasting color in the foliage; generally the inner part of the leaf is a shining silvery, while the tops of the leaves are of a dark green. The stems are mostly fawn colored. In different varieties the stem and leaves vary in size and form and the colors change throughout the growing periods. Older plants produce edible fruit.

AUTUMN ELAEAGNUS**E. umbellata**

A large shrub, with yellowish brown branchlets and leaves light green above and silvery beneath. Cutting grown.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$5.00	\$4.00
B&B 4 to 5 ft.....	4.00	3.20
NB 2 to 3 ft.....	.60	.40

DWARF THORNY ELAEAGNUS (Grafted)**E. Pungens nana**

Spreading growth, medium height, usually spiny. Leaves Live Oak shape, glabrous above and silvery white underneath, dotted with brown scales.

FRUITLANDI'S ELAEAGNUS (Grafted)**E. macrophylla**

Large, medium green leaves, silvery underneath, with new growth and stems fawn colored. Rather compact, fast grower.

SIMON'S ELAEAGNUS (Grafted)**E. pungens simoni**

Its small leaves are dark green and dotted with silver scales on the upper surface; silvery underneath. Younger foliage and stems are brownish.

Height	Each	Ea. per 10

Evergreens have an elegance of form desirable in foundation planting

Euonymus**GLOSSY WINTERCREEPER EUONYMUS*****E. radicans carriere***

A very useful ornamental with dark green, glossy foliage which can be used for group, specimen or foundation plantings.

Spread	Each	Ea. per 10
B&B 3 to 4 ft.....	\$3.00	\$2.50
B&B 2 to 3 ft.....	2.50	2.00
B&B 18 to 24 in.....	2.00	1.60
B&B 12 to 18 in.....	1.60	1.30
NB 18 to 24 in.....	1.00	.80
NB 12 to 18 in.....	.80	.60

JAPANESE EUONYMUS***E. japonica***

A useful ornamental with green glossy foliage, ideal for group or foundation plantings.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$3.20	\$2.50
B&B 2 to 3 ft.....	2.40	2.00
B&B 18 to 24 in.....	2.00	1.60

Just as different effects in building architecture are obtained with different materials, so are different plants employed in planting the home grounds. Tall conifers produce the stately effects found in classical lines of architecture. Plant them in corners, at formal entrances, against tall buildings, and in groups at points which form a view from convenient windows. Italian cypress is the variety much used to accent the corners.

Feijoa**PINEAPPLE GUAVA*****Feijoa sellowiana***

Very hardy, spreading shrub, standing 15 degrees frost. Foliage gray-green, silvery underneath. Flowers beautiful, numerous red stamens in center surrounded by saucer-shaped white petals. Very drought resistant. Fruit dark green. The Feijoa is an accent plant in landscape work on account of its gray-green coloring.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$5.00	\$4.00
B&B 2 to 3 ft.....	3.50	3.00
B&B 18 to 24 in.....	2.50	2.25

GRAFTED FEIJOAS**CHOICEANA, SUPERBA, COOLIDGE,**

Similar to above in foliage and character of growth. The three best grafted varieties; producing gray-green fruit, the size of a hen's egg, with a pleasant banana flavor. Two varieties or more should be planted together to insure cross pollination, resulting in a good crop.

Height	Each	Ea. per 10
B&B 18 to 24 in.....	\$4.25	\$3.50
B&B 12 to 24 in.....	3.00	2.50

Guava***P. cattleyanum***

Ornamental, fruit bearing evergreens of many desirable qualities. Large leaves. Fruit delicious, being eaten when fresh, crystallized, preserved, or made into jellies. One of the best fruits for jelly making. Widely grown in California and well adapted to Gulf Coast, both as fruit producer and ornamental. Valuable landscape plant as specimen or in groups and masses.

STRAWBERRY GUAVA***P. cattleianum***

A shrub or small tree, which produces an abundance of luscious fruit, about the size of a large strawberry. Fruit has few equals for jams and jellies. Leaves rich green in color.

YELLOW CATLEY GUAVA ***P. cattleianum lucidum***
Very much like the Catley Guava but the meat is yellow, larger, and said by some to be sweeter.

Height	Each	Ea. per 10
B&B 2 to 3 ft.....	\$3.50	\$2.75
B&B 18 to 24 in.....	2.75	2.25
B&B 12 to 18 in.....	2.25	1.75

BROADLEAF EVERGREENS—Continued

Holly*Ilex***YAUPON HOLLY SHEARED**

A native shrub with spreading branches and small oval or oblong leaves. During the winter the tree is a mass of scarlet berries, which make it a most conspicuous plant. Most effective when planted in clumps. Unaffected by heat or drought.

Height	Each	Ea. per 10
B&B 3 to 3½ ft.....	\$6.00	\$50.00
B&B 2½ to 3 ft.....	5.00	4.00
B&B 2 to 2½ ft.....	4.00	3.00

A Hardy Selection of Our Plants Used Above the Coastal Belt

An Oleander B. & B. with Griffing's Balling Soil.

Oleanders*Nerium*

The well known shrub bearing long, narrow leaves and very brilliant heads of colorful blossoms, good for outside effect and beautiful for cut flowers. Up-right growth, good for mass and foundation planting. Unsurpassed as a lawn specimen or shrub to alternate with street trees or beautify a boulevard or park. If tops freeze in more northern locations it will come out from the roots with luxuriant growth.

As Oleander specialists, we have for years made it a point of our annual trips to search out new types for trial and selection. In this way, we have built one of the most complete collections of Oleanders secured from other growers, and propagated in our own experiment division. We have taken special care to select accurately and list according to descriptions, so that a customer can know exactly what color Oleander he is getting. As novelties for your home plantings you will find these to be most beautiful.

PRIMROSE JASMINE

J. primulinum
An excellent yellow flowering shrub or vine, blooming profusely in the early spring and summer. An evergreen in this section, but further north loses its foliage in winter. An improvement upon *Jasminum nudiflorum*.

WINTER JASMINE

J. nudiflorum
A very graceful, hardy, drooping plant with dark green bark, appearing evergreen; leaves dark green; bright yellow flowers in early January and continuing for some time. Hardy.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$2.75	\$2.25
B&B 3 to 4 ft.....	2.50	2.00
B&B 2 to 3 ft.....	2.00	1.50
NB 2 to 3 ft.....	1.00	.75
NB 18 to 24 in.....	.75	.50

Lavender

Lavendula

COTTON LAVENDER

L. santolina chamaecyparis
(Ground cypress)

Sweet smelling dwarf evergreen perennial, with silver white foliage; useful as border plant and in carpet bedding.

Height	Each	Ea. per 10
B&B 2 to 2½ ft.....	\$2.50	\$2.00
B&B 18 to 24 in.....	1.75	1.50

NB 18 to 24 in.....	1.00	.75
NB 9 to 12 in.....	.75	.50

TRUE LAVENDER

L. Vera *L. officinalis*
Soft grayish carnation-like foliage. Low growing, roundish compact form. Excellent for bordering. Spikes of lavender flowers in Spring.

Height	Each	Ea. per 10
B&B 18 to 24 in.....	\$2.75	\$2.25
B&B 15 to 18 in.....	2.50	2.00
B&B 12 to 15 in.....	2.00	1.50

Loquats

JAPANESE LOQUAT

(Japanese Medlar)

Eriobotrya

The Loquat enjoys a large acquaintance. The leaf is large, prickly edged and dark green, when mature. Young leaves are lighter green, some being a creamy shade. The flowers are borne in fragrant panicles from three to seven inches long, blooming in fall and winter. The fruit is thin skinned, golden yellow, and is of good flavor. The loquat is good for ornamental use because it will grow in a wide variety of soils and is not likely to die, leaving a gap in your planting.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$8.00	\$6.00
B&B 4 to 5 ft.....	6.00	5.00
B&B 3 to 4 ft.....	5.00	4.00

B&B 5 to 7 ft.....	10.75	Specimens.

Magnolia

SOUTHERN MAGNOLIA

M. grandiflora

The well known Magnolia of the South, making a large, stately tree in time, although of slow growth. Has beautiful dark green, heavy shining foliage, and in the Summer, produces magnificent large, pearly white flowers, 6 to 8 inches across. Intensely fragrant. A lovely street or specimen tree. Hardy.

Height	Each	Ea. per 10
B&B 6 to 8 ft.....	\$11.00	\$9.00
B&B 5 to 6 ft.....	8.50	7.00
B&B 4 to 5 ft.....	7.00	6.00
B&B 3 to 4 ft.....	5.50	4.50
B&B 2 to 3 ft.....	4.00	3.00
B&B 18 to 24 in.....	3.00	2.50
B&B 6 to 8 ft.....	12.75	Specimens.

SWEET BAY MAGNOLIA

M. glauca

Very similar to *Magnolia Grandiflora*, except under side of leaves are grayish white. Blooms about one fourth as large.

Height	Each	Ea. per 10
B&B 6 to 8 ft.....	\$9.00	\$7.50
B&B 5 to 6 ft.....	6.50	5.50
B&B 4 to 5 ft.....	5.00	4.00

Broom

WOODWAXEN BROOM

Genista tinctoria

Ornamental, erect shrub to 3 ft., with yellowish green branches, and yellow flowers.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$3.00	\$2.50
B&B 3 to 4 ft.....	2.50	2.00
NB 3 to 4 ft.....	.75	.50

Pittosporum

Nandina Domestica

Rosemary Myrtle

BROADLEAF EVERGREENS—Continued

*Myrtle**Myrtus*

ROSEMARY MYRTLE *M. communis micraphylla*
Distinguished by its light green, very fine foliage. A striking specimen or border for taller shrubs. Fine, shiny green, pointed leaves cover every branch. Beautiful specimens.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$4.00	\$3.00
B&B 2 to 3 ft.....	3.00	2.50
B&B 18 to 24 in.....	2.50	2.00
B&B 4 to 5 ft.....	5.75	Specimens.

VARIEGATED ROMAN MYRTLE*M. communis variegata*

The variegated foliage of this evergreen makes it a spot attractive in a mass of plants or an attractive plant to use as a specimen on the lawn. The dark berries and the white flowers, as well as the aromatic foliage make the plant a pleasant addition to the garden.

Height	Each	Ea. per 10
B&B 2 to 3 ft.....	\$3.75	\$2.75
B&B 18 to 24 in.....	3.00	2.50
B&B 12 to 18 in.....	2.00	1.50

*Nandina***NANDINA** *Nandina Domestica*
(Heavenly Bush) or (Quinine Bush)

The delicate foliage of the Nandina is a brilliant dash of gorgeous orange red or crimson color in winter. It is dense and stocky, being one of the dwarfish plants of Japanese gardens. The leaves are rich red when young, dark green at maturity, and boldly colored in winter. Nandina thrives well in any well drained, loamy soil, and is fairly hardy. In autumn it is covered with showy clusters of small red berries. This plant is one of the three plants used in the better class of landscape work.

Height	Each	Ea. per 10
B&B 2½ to 3 ft.....	\$4.50	\$3.50
B&B 2 to 2½ ft.....	3.50	2.75
B&B 18 to 24 in.....	2.75	2.25
B&B 15 to 18 in.....	2.00	1.50
B&B 12 to 15 in.....	1.50	1.25
B&B 9 to 12 in.....	1.00	.75
NB 9 to 12 in.....	.75	.50
NB 6 to 9 in.....	.50	.25

*Photina***LOW PHOTINIA** *P. Dentata*

Moderately upright; large leaves of dark green with new growth first blood red, then tan and fawn color and in winter some of the old leaves crimson.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$3.50	\$2.75
B&B 2 to 3 ft.....	2.75	2.25

Visit our Nursery, the largest in the South. See for yourself the newest and finest stock on earth.

Pittosporum

One of the aristocrats among Southern evergreens, Pittosporum is perhaps more frequently admired than any other broadleaf evergreen. The leaves which grow in whorls form a rosette at the end of the twig. This along with the dense dark green mass of the plant comprises its chief charm. Pittosporum takes kindly to shearing.

TOBIRA PITTOSPORUM*P. tobira*

A wide spreading, dense, round headed shrub, with deep, glossy, green foliage, clustered at the end of branches. In the Winter it is covered with masses of small, fragrant, yellowish white flowers, resembling orange blossoms. Excellent for massing.

Height	Each	Ea. per 10
--------	------	------------

B&B 3 to 4 ft.....	\$4.50	\$3.50

B&B 3 to 4 ft.....	4.00	3.00

Privet

Ligustrum

The shrubs essential to landscaping. The word "Ligustrum" refers to the entire family of Privets which is by far the largest and best group of Broadleaf Evergreens. Varieties differ widely in size, shape, habit of growth, and color. With the addition of very few plants such as Conifers, Flowering Deciduous Shrubs and the Grasses, the Privets make complete plantings. Upright or Pyramid shapes for corners and high points; medium spreading types (Crinklyleaf, Erecta, etc.) for the general usage and tapering down to the low, compact varieties, (Griffings Waxleaf and Variegated Nepal) for the low points, borders, and beneath wind-dows.

Large and small leaves, dark and light green, brilliant gold and mottled effects all combine to give perfect appearance to the plantings of Privets. Beautiful trimmed hedges or high, informal screens are rapidly formed by some varieties (Chinensis, Big Leaf, and Japanese). The Griffings Waxleaf and Chinensis types provide the South with formally trimmed plants shaped in balls, cones, etc., to mark entrances and place in boxes for decorations.

Fragrant white flowers are borne in spring and black fruit follows, remaining on the plants during winter, in medium and large clusters like wild grapes.

This group cannot be too extensively planted and is in such variety that it will fill practically every need. We recommend the types listed as being the most generally perfect ornamentals grown and ones that will give universal pleasing and satisfactory results.

CHINESE UNSHEARED PRIVET

L. sinensis

Formerly and erroneously called Amour River Ligustrum. Fine leaf type. Fine large shrub specimen or screen planting, the horizontal, feathery, fern-like method of branching being exceedingly beautiful. Foliage is light green, small leaves, practically evergreen in this country.

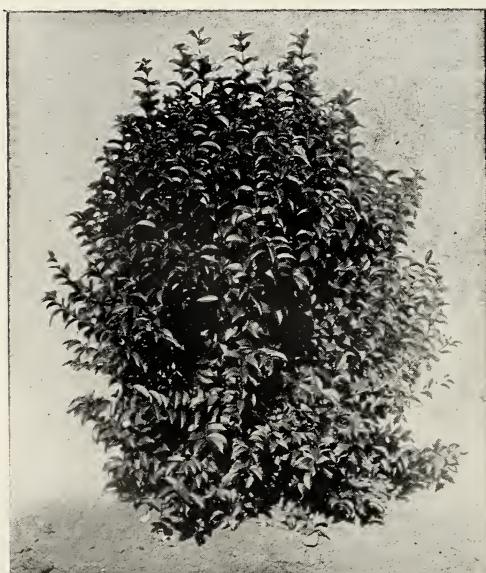

Height	Each	Ea. per 10
B&B 6 to 8 ft.....	\$4.00	\$3.00
B&B 5 to 6 ft.....	3.00	2.50

NB 3 to 4 ft.....	.60	.50
NB 2 to 3 ft.....	.40	.30

CHINESE SHEARED PRIVET

L. sinensis

Formerly and erroneously called Amour River Ligustrum. Fine leaf type. These plants have been carefully sheared into formal shapes, and are compactly grown.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$5.00	\$4.00
B&B 3½ to 4 ft.....	4.00	3.00
B&B 3 to 3½ ft.....	3.00	2.50
B&B 2½ to 3 ft.....	2.50	2.00

Bigberry Privet

Griffings Waxleaf for Street Planting Always Clean and Shapely

CHINESE WEEPING PRIVET *L. sinensis prostrata*

Formerly and erroneously called Amour River Ligustrum. This is excellent to plant where drooping effect is needed. Resembles the Amur variety except in having drooping or weeping method of branching.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$3.75	\$3.25
B&B 3 to 4 ft.....	2.50	2.00
B&B 2 to 3 ft.....	2.00	1.75

BIGBERRY PRIVET *L. japonicum macrophyllus*
(Grafted)

Large leaf type. Grafted, hence true to type and form. Distinguished by exceedingly large leaves and clusters of grape-like berries, this variety is excellent for high banking or mass planting. Foliage changes dark green to a bronze or brownish-green in autumn.

Height	Each	Ea. per 10
B&B 6 to 8 ft.....	\$4.50	\$3.50
B&B 5 to 6 ft.....	3.50	3.00
B&B 4 to 5 ft.....	3.00	2.50

BLACKLEAF PRIVET *L. lucidum blackleaf*

Introduced by Griffings Nurseries a few years ago. A medium upright type, with large, glossy, heavy foliage. A compact grower, and one of the best for general planting. Very hardy.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$6.75	\$5.25
B&B 4 to 5 ft.....	5.00	4.00
B&B 3 to 4 ft.....	4.00	3.00
B&B 2 to 3 ft.....	3.00	2.50
B&B 18 to 24 in.....	2.00	1.50

CRINKELYLEAF PRIVET *L. lucidum crinkelyleaf*

Originated by us several years ago. The medium sized, dark green leaves are extremely glossy, and re-curved or crinkly. An upright grower, well filled at base. Conceded by some to be superior to any other lucidums and proving to be the hardest of all Ligustrums, living through 20° below zero at Tulsa, Okla., winter 1927, when all other varieties froze, even California Privets.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$6.75	\$5.25
B&B 4 to 5 ft.....	5.75	4.25
B&B 3 to 4 ft.....	4.25	3.25
B&B 2 to 3 ft.....	2.75	2.25
B&B 6 to 7 ft.....	9.75	Specimens.

GRIFFINGS WAXLEAF PRIVET *L. lucidum compacta*

A sport originated by Griffings Nurseries, and considered by many to be the best variety ever developed. Leaves are somewhat twisted, very thick and waxy, the upper surface being highly glossed, dark green, while the under side is of a lighter shade. Bushy, very compact, and heavily branched. Can be sheared into perfect forms. Hardy, both from frost and disease. We obtained it in a bankrupt stock of the Japanese Nurseries in a large shipment of Lucidum Privets imported from Japan. This one plant was a sport or mutation. The unusual beauty of it was instantly noted by us, and it was carefully segregated, to such an extent that the strain has been kept pure for our propagation.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$8.00	\$6.50
B&B 3 to 4 ft.....	6.00	4.50
B&B 2½ to 3 ft.....	4.00	2.80

B&B 8 to 10 ft.....	12.00 Specimens.	
B&B 6 to 8 ft.....	8.50 Specimens.	

COME VISIT US. It is a pleasure to entertain you and show you over the nursery and it will prove worth while to you.

Sheared Griffing's Waxleaf Ligustrum

VARIEGATED NEPAL PRIVET *L. nepalense variegata* (Iwata)

Formerly known as Iwata. Characterized by mottled shades of light yellowish-green in center of leaves; rather compact, low-growing Lucidum. Leaves are small, thick, very shiny. Maintains a wide-spreading, well-formed, symmetrical shape. First to bloom in Spring.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$5.00	\$4.00
B&B 3 to 4 ft.....	3.75	3.00
B&B 2 to 3 ft.....	2.75	2.00
B&B 18 to 24 in.....	2.00	1.50
B&B 6 to 8 ft.....	9.75 Specimens.	
B&B 5 to 6 ft.....	7.75 Specimens.	

**Order Early While Stocks
Are Complete**

While our prices are as low as any, yet our aim is not to be the cheapest; value is our big consideration and aim.. We could reduce nurturing costs and consequently selling prices, but that would not be giving Quality and Value.

Deodar Cedar—See page 4

BROADLEAF EVERGREENS—Continued

Salvia

AUTUMN SALVIA

A shrub of medium height, with slender branches, small leaves, and bearing numerous racemes, three inches long, of purplish-red bell-shaped flowers.

Height	Each	Ea. per 10
B&B 2 to 3 ft.....	\$2.50	\$2.00
B&B 18 to 24 in.....	2.00	1.50
B&B 12 to 18 in.....	1.50	1.25

Sesbania

PURPLE SESBANIA

An attractive shrub or small tree. Leaves a small, light green, on surface, glaucous beneath. Flowers bright red purple. Very showy.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$2.00	\$1.50
B&B 3 to 4 ft.....	1.50	1.25
NB 3 to 5 ft.....	1.25	.75

*Silverleaf (Senisa)**Leucophyllum Texanum*

Mexicans call it (*Senisa*). A most beautiful shrub of medium growth. Leaves small, oval form ashy gray or silver color, and no other shrub has such striking beauty in this sense. After rain periods, a profusion of very showy orchid flowers heighten the effect of the silvery leaves.

Height	Each	Ea. per 10
B&B 4 to 5 ft.....	\$5.00	\$4.50
B&B 3 to 4 ft.....	4.00	3.50

*Rosemary**Rosmarinus officinalis*

Gray-green, sage color, low evergreen with blue

Climbing and Creeping Vines

Do not allow your vines to cover entirely a well designed doorway or window. Let them frame the good features of the house and cover its architectural defects. Training or trimming should be shrewdly done to keep the naturalistic effect, which vines give to planting.

*Caroline Jasmine**Gelsemium Sempervirens*

An evergreen native climber with dark green pointed leaves. Rapid growing, bearing great profusion of golden yellow blossoms in early spring, striking effect in tall deciduous tree.

*Hall's Honeysuckle**Lonicera Japonica Halliana*

A very vigorous evergreen climber. White flowers changing to yellow are borne in great profusion in late spring or early summer, and again sparingly in the Autumn. Good for trellis and ground covers.

*Painted Trumpet**Bignonia Speciosa*

A robust, hardy, woody vine, twines tightly with numerous tendrils along stem. Orange scarlet flowers of trumpet shape cluster at tips of branches. Leaves light green, showy.

*Rosa De Montana**Antigonon Leptopus*

A beautiful climbing plant with tuberous roots; blooms freely from June until fall. Beautiful, rosypink flowers produced in large racemes. Leaves heart-

flowers borne in the axiles of the leaves; one of the old favorites among aromatic shrubs.

Height	Each	Ea. per 10
B&B 2 to 2½ ft.....	\$2.50	\$2.00
B&B 18 to 24 in.....	2.25	1.25
B&B 12 to 18 in.....	1.50	1.25

Tamarix

EVERGREEN SALT CEDAR

(Athel tree)

A bushy tree with slender jointed branches, and gray green foliage.

JUNIPER TAMARAX

*T. juniperina**(T. plumosa)*

Shrub or small tree with slender spreading branches. Leaves green, flowers pink.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$1.75	\$1.50
B&B 2 to 3 ft.....	1.25	1.00
NB 3 to 5 ft.....	1.00	.75
NB 2 to 3 ft.....	.50	.40

Viburnum

LAURUSTINUS VIBURNUM

V. tinus

Well known winter flowering shrub, bearing clusters of small flesh colored flowers in great profusion. Unexcelled for planting or specimens.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$3.00	\$2.50
B&B 2 to 3 ft.....	2.50	2.00
B&B 18 to 24 in.....	2.00	1.50
B&B 12 to 18 in.....	1.50	1.25

SANDANKWA VIBURNUM

V. suspensum

A bushy spreading shrub with slender, angled branches and large leaves, shiny and dark green above and pale beneath. Flowers in clusters white tinged with pink. A luxuriant appearing evergreen from the South Sea Islands.

Height	Each	Ea. per 10
B&B 2 to 2½ ft.....	4.00	3.00
B&B 12 to 18 in.....	2.00	1.50

shaped. A most desirable vine for the South. In this section tops die down in Winter; it is therefore advisable to protect the roots with a mulching of leaves.

*Woodbine**Lonicera Periclymenum*

Very attractive red blossoms similar to Honey-suckles.

*Wisteria**Wisteria Chinensis Purpurea*

The ever popular hardy vine for pergolas and porches. Long drooping clusters of fragrant purple blooms.

PRICES ON ABOVE VINES AS FOLLOWS:

Thick leathery green leaves; good ground cover, thrives in shade, dark evergreen foliage.

Price same as Fig Vine.

*Fig Vine**Ficus Repens*

Small dark green heart-shaped leaves making a mat of foliage against a building.

	Each	Ea. per 10
From 4 inch pots	\$1.00	\$.75
From 2½ inch pots40	.25

*Bougainvillea**B. Spectabilis*
(Brazilianis)

Vigorous, woody vine, evergreen, leaves a mass of brilliant reddish-purple flowers against a background of bright green leaves.

	Each	Ea. per 10
From 6 inch pots	\$2.50	\$2.00
From 2½ inch pots	1.25	.75

If you will just give us the chance to fill an order for you we will prove the superiority of Griffings Stock to you.

Deciduous Shrubs

Add Beauty Through Grace of Form and Flower

Although they are bare in winter, their beauty of foliage and colorful flower more than compensates in the Summer and Spring. Add color to your lawn with a liberal distribution of these seasonal plants.

Prune these shrubs when they have finished blooming. Do not prune them when dormant, as that spoils their chances of flowering.

Althea

ROSE OF SHARON

Favorite old fashioned flowering shrub, deserving of space in any garden.

ARDENS—Double; lilac with carmine, fading to light.
BANNER—Double; white cherry-red center. Medium size.

BOULE DE FEU—Very double, deep red. Medium size.
PRINCE LOUIS—Large, double, pink flowers. Dwarf habit.

AMPLISSIMA—Orange red flowers.

SNOWFLAKE—Flowers pure white, single.

NB	2 to 3 ft.....	.30	.25

Coral Berry

Symphoricarpos Vulgaris

Often called Indian Curant. Fine for low border, foundation or mass planting; red berries remain on all winter. As a colorful border of taller plants they are unexcelled. When placed in front of taller growing conifers, they make pictures of unusual beauty. Foliage is dense, light green, pubescent underneath.

	Height	Each	Ea. per 10
B&B	3 to 4 ft.....	\$2.00	\$1.50
B&B	2 to 3 ft.....	1.75	1.25
NB	2 to 3 ft.....	.60	.50

Crape Myrtle

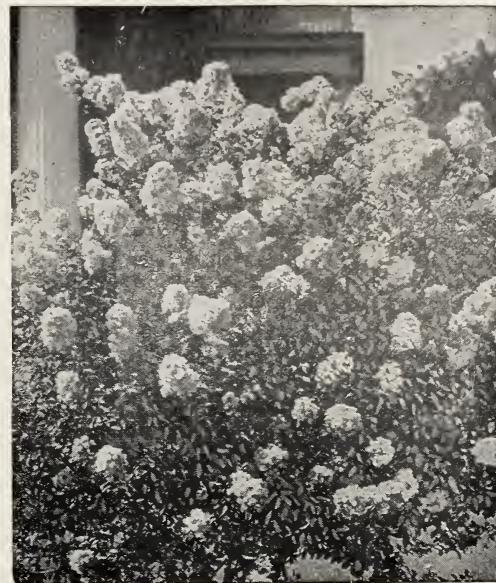

Lagerstroemia Indica

Favorite flowering shrub of the South, hardy and heavy bloomer, it paints the landscape in summer months with its brilliant blossoms in tones of crimson, red, pink, purple, and other shades. Frequently termed the "Lilac of the South." Combinations of crape myrtle colors make the most exquisite effects obtainable.

DWARF BLUE CRAPE MYRTLE

L. i. nana corrugata
A new variety of rare beauty. Of low growth with distinctive bluish colored flowers blooming in great profusion throughout the season.

	Height	Each	Ea. per 10
B&B	2 to 2½ ft.....	\$3.50	\$2.25

Griffing's Watermelon Pink Crepe Myrtle—One of the Prettiest and Best Shrubs

GRIFFING WATERMELON PINK CRAPE MYRTLE

L. i. watermelon

(Dwarf Crimson or Red)

The watermelon pink or cerise color so much desired is very pronounced in this variety. The flower heads are exceptionally large and fluffy, the color rich, clear and bright. No shrub makes such a gorgeous display in a planting as this. The compact natural growth is easily controlled by pruning so as to make a very dwarfed plant. We prune our young plants several times to induce thick branching with dense foliage and many flower buds. Interplanted with evergreens, beautiful effects are obtained. Massed in groups of any size, a display of color unrivaled is had the first summer. The most generous usage and the demand of recent years indicates its great popularity. Our type is recognized by our trade as being the best on the market. For big developments, sub-divisions, parks, etc., they can be used by the thousand to great advantage. As a shrub to alternate with street trees they have met with favor.

WHITE CRAPE MYRTLE

L. i. alba

Large, showy lilac colored flowers. Flowers, snow white, bright and very fluffy, a fitting companion to the Watermelon Pink, where striking effects are desired.

Price Watermelon Pink and White

Jerusalem Thorn**Parkinsonia aculeata
(Retama)**

A showy ornamental tree with smooth bright green bark and many feathery reed-like branchlets to take the place of leaves. During the summer is covered with many small bright yellow flowers.

Purpleleaf Plum**PRUNUS PISSARDI** **Prunus cerasifera**
(Thunder-cloud Plum)

A very graceful small tree with purple leaves, giving a rich spot of color to any landscape planting. It retains its deep color throughout the warmest weather and its leaves last until mid-winter. Medium size acid fruit, purple throughout.

Height	Each	Ea. per 10
B&B 5 to 6 ft.....	\$3.00	\$2.70
B&B 4 to 5 ft.....	2.50	2.30
NB 4 to 5 ft.....	1.00	.80
NB 3 to 4 ft.....	.80	.70

Pussy Willow**Salix discolor**

The earliest spring beauty; catkins used by florists. The popularity of the sprigs in spring and an increasing desire to have seasonal effects in planting makes this shrub very desirable.

Quince**FLOWERING QUINCE** **Cydonia Japonica**
(Japan Quince and Firebush)

Branches covered in early spring with bright semi-double, rosy-red flowers.

Sumac**Rhus typhina****STAGHORN**

Valuable for their large leaves coloring scarlet in autumn, also for the conspicuous panicles of deep red fruits throughout the winter.

Spirea**(Bridal Wreath)****VAN HOUTTE SPIREA**

Well known deciduous flowering shrub, with long graceful drooping branches, covered with small white blossoms in the Spring.

Price Willow, Quince, Sumac and Spirea.

Height	Each	Ea. per 10
B&B 3 to 4 ft.....	\$1.50	\$1.25
B&B 2 to 3 ft.....	1.25	1.00

St. Johnswort**Hypericum moserianum**

Low growing shrub; produces large single, bright yellow flowers, which open out flat.

Height	Each	Ea. per 10
B&B 15 to 18 in.....	\$2.50	\$2.00
B&B 12 to 15 in.....	2.00	1.50

Hedge Plants

The hedge is more than its own excuse for being; it justifies its existence in various ways. Around the small yard of a cottage or the formal terrace of a city house, the Amur Privet or Arborvitae can be trimmed and kept in scale with the size of the lawn.

For decorative hedges the Waxleaf Privet, Cape Jasmine, Abelia, Cherry Laurel, Boxwood and the Oleander are satisfactory. Crape Myrtle and other deciduous shrubs can be used in limited amounts. The fact that they lose their leaves in winter prevents their use in greater numbers.

Chinese Privet**L. sinensis**

Very beautiful evergreen in the South, dense in growth, dark green, very compact. Very hardy and well adapted to general planting. Shears for any height or shape.

Chinese Weeping Privet**L. sinensis Prostrata**

Something new, stands trimming as well as the ordinary Chinese. A graceful weeping effect. Untrimmed it attains a weeping effect for borders, not as stiff as a sheared hedge.

Height	Ea. per 10	Ea. per 100
NB 4 to 5 ft.....	\$.40	\$.30
NB 3 to 4 ft.....	.25	.20
NB 2 to 3 ft.....	.20	.15

The Bamboo fits into many situations

Bamboos

Both large and small forms, the Bamboos can be chosen for any location. Dense, plume-like foliage is entirely evergreen. Certain varieties make beautiful screen for hiding garages and outbuildings and obstructing unsightly views. They can be trimmed and sheared into beautiful rounded specimen of remarkable beauty. The dwarf type is adapted to hedge planting and should be used for property lines, separating lawn and flower or vegetable gardens, or for enclosing any area which is suited to hedge planting. Hardy, cheaper than fencing, evergreen and unusually beautiful. Stools but does not spread like reeds or Johnson grass.

FEATHER BAMBOO

B. vulgaris
Large, graceful variety with green stems and foliage of feathery appearance.

GOLDEN BAMBOO

B. vulgaris aurea variegata

Stems golden, penciled with green. Foliage green.

NINGALA BAMBOO

Arundinaria falceata

(Dwarf Bamboo)

A broad spreading low growing bamboo with graceful arching branches and finely divided compound leaves.

SILVERSTRIPE BAMBOO

R. arundinaria simoni

Silver or white stripe in leaf, otherwise like the Feather variety.

Eulalia Grass

Miscanthus Sinensis

Very airy and graceful. Beautiful effect at low cost. The varieties offer variation in effects.

MAIDEN GRASS

which is solid green in color.

STRIPED GRASS which has white pin stripes length-wise of the blades.

ZEBRA GRASS which has white bars cross-wise of the blades.

Fountain Grass

Pennisetum Ruppeli

Dwarf grass growing eighteen inches tall with beautiful white plumes.

Japanese Bamboo

Century Plant

Eulalia Grass

Amoor River Privet Hedge

Pampas Grass

Cortaderia Argentea

Beautiful light green foliage, gracefully recurved. Makes large clumps. In summer sends up tall silvery plumes which are very distinctive and beautiful.

	Each	Ea. per 10

Banana

COMMON BANANA

Musa sapientum
Fruiting banana from Florida. Gives a decided tropical effect when used with Spanish Architecture.

	Each	Ea. per 10
B&B Large Divisions	\$4.00	\$3.50
B&B Medium Divisions	3.00	2.50
NB Small Divisions	1.50	1.00
NB Medium Divisions	1.75	1.50

NOTE: We cut off the stalk half way unless instructed otherwise.

Yucca and Cactus

Native of the Southwest, especially the arid region. Excellent for planting with Spanish Architecture.

COMMON YUCCA

Y. filamentosa

(Adams Needle)
Leaves 1½ ft. to 3 ft. long about 1 inch wide. Flowers produced on long stalks 4 to 12 feet high. Nearly white.

GLAUCA YUCCA

Y. Glauca

Leaves are short thick, about 2 inches wide forming a small head on top of a tall heavy trunk. Produces stalks of white flowers.

RED YUCCA

Y. Hesperaloe parviflora

A handsome dwarf Yucca with narrow tongued leaves and beautiful red flowers borne on short red stems about 18 inches long.

SPANISH BAYONET

Y. treculeana

The trunk reaches 10 ft. in height with head of dark green leaves topped in Spring with a great truss of creamy white flowers.

Roses

Throughout the South Griffing's selected Everblooming adapted roses have been the choice of thousands of customers for many years.

Favorable soil and climatic conditions, coupled with years of experience in rose growing, enable us to produce roses with exceptionally strong well branched tops and heavy, fibrous root systems. All varieties are budded on Odorata or Canina root.

Special B&B Roses

While not of general interest of nurserymen, many have requested B & B stock. To meet this need, we are offering the two best varieties, Radiance and Red Radiance, grown on famous Rosedale Balling Soil.

	Each	Ea. per 10
B&B No. 1-3 yr....	\$2.00	\$1.50
B&B No. 2-2 yr....	1.50	1.25

Bush and Climbing Roses

CLASSIFICATION: Roses are descended from several distinct classes or families and the following key will enable one to find to which strains or classes each belongs. (H.P.), Hybrid Perpetual; (H.T.), Hybrid Tea; (B.K.), Banksian; (Bour.), Bourbon; (Beng.), Bengal; (N.), Noisette; (Poly.), Polyantha; (H.Ch.), Hybrid China; (H.N.), Hybrid Noisette; (T.), Tea; (Cl.), Climber; (H.W.), Hybrid Whirauana; (Laev.), Laevigata.

AMERICAN BEAUTY, WHITE. See F. K. Druschki.

ANTOINE REVOIRE (H.T.) Creamy white; a new wonderful rose in class with Radiance.

BLACK PRINCE (H.T.) Velvety crimson with shadings of purplish-black. Upright, strong, profusion of flowers.

CL. AMERICAN BEAUTY (H.T.W.) Gorgeous spring bloomer; red.

CL. BEAUMONT RED (Cl.H.T.) Unidentified red everblooming climber and of great value.

CL. BRIDESMAID (Cl.T.) Pink, with soft yellow shadings at base of petals. A good, vigorous climber and constant bloomer.

CL. CAROLINE TESTOUT (Cl.T.) Delicate pink. Vigorous climber producing abundance of large cup shaped blossoms.

CL. METEOR (C.H.T.) A grand climber; velvety maroon; very free bloomer.

CL. WOOTEN (H.T.) Bright magenta-red.

COLUMBIA Large size, very fragrant. Color, clear imperial pink, deepening as it opens to glowing pink.

DOROTHY PERKINS (H.W.) Clear shell-pink flowers, the petals of which are attractively crinkled.

ELLEN PAULSEN (D.pol.) Bright cherry-pink, fragrant, double flowers of large size in many compact clusters; glossy dark green foliage.

ETOILE DE FRANCE (H.T.) Clear, velvety crimson. Cupped buds born on stiff stem. Deliciously fragrant. Vigorous grower and profuse bloomer. Medium spreading.

EUGENE FURST (H.P.) Deep red, shaded crimson; a profuse bloomer; fine form; large and full.

FRANCES SCOTT KEY (H.T.) Red, shading to cerise, very large with a profusion of petals opening to a high center.

FRAU KARL DRUSCHKI or WHITE AMERICAN BEAUTY (H.P.) One of the purest white roses. Known also as Snow Queen. Very large blooms, on good stiff stems with splendid foliage. Good upright grower.

GAINSBOROUGH or Climbing Viscountess Folkestone (C.H.T.) Delicately tinted fawn, almost white with a satiny luster. Very large flowers resembling a white fluffy peony.

GENERAL JACQUEMINOT (H.P.) Bright shining crimson. Very fragrant, free bloomer. Upright grower.

General WASHINGTON (H.P.) Crimson red. Large full flat form. A profuse bloomer.

JONKHEER J. L. MOCK (H.T.) Clear imperial pink. Blooms are of the largest size, highly perfumed. A gold Medal winner. Color between Pink and Red Radiance.

JOSEPH HILL (H.T.) Salmon yellow; pink edges. Small upright growth.

KAISERIN AUGUSTA VICTORIA (H.T.) Pure white; shaded large buds making the choicest vase flowers.

LADY HILLINGDON (T.) Deep apricot yellow to orange; long pointed buds; a very free-flowering variety and striking decorative rose, sturdy, spreading growth. (Similar to Sunburst).

LOS ANGELES (H.T.) Luminous flame-pink toned with coral and shaded with translucent gold at base of petals. Vigorous, continuous upright and long stemmed.

LOUIS PHILIPPE (Beng.) Everblooming, rich, velvety crimson. Spreading.

LUXEMBOURG (H.T.) Yellow, proving to be one of the best. Long stems, pointed buds. Excellent for cut flowers. Upright grower.

MME. CAROLINE TESTOUT (H.T.) Flowers large, very double; silvery rose; free bloomer.

MME. CECILE BERTHOD (T.) Deep, golden yellow. Vigorous spreading habit.

MME. JOS. SCHWARTZ (T.) Silvery-white shaded with pink. Resembles Dutchess de Brabant. Sometimes called White Dutchess. Dainty cup shaped blooms, free bloomer, vigorous spreading habit.

MME. JULE GROLEZ (H.T.) Bright rich, rosy red blooms. Spreading habit.

MAMAN COCHET, WHITE (T.) Pearly-white with exquisite shadings of delicate pink, of same habit as the Pink Cochet. It is easily ranked as one of the few best of white roses.

MARECHAL NEIL (Cl.N.) Golden yellow. The grand old Southern favorite with a fragrance equalled by none. Double blooms.

MARY COUNTESS OF ILCHESTER (H.T.) Large, fragrant, crimson flowers. The bush is a vigorous grower and free bloomer.

MRS. CHARLES BELL, or "SHELL PINK RADIANCE" (H.T.) Shell-pink on a salmon background, otherwise same as Radiance from which it is a sport. Newest member of an illustrious family.

MRS. DUDLEY CROSS or HELEN GOOD (H.T.) Beautiful creamy-white with delicate edging of carmine at edge of petals, base of petals rosy yellow. Fine-formed buds. Good bloomer, double. Good vase rose. Strong vigorous grower of spreading habit. Perfectly thornless.

MRS. ROBERT PEARY (Cl.H.T.) Ivory white.

MRS. A. R. WADDELL (H.T.) Roses scarlet opening coppery salmon. Long pointed buds; large semi-double, showy, rampant grower.

PAUL NEYRON (H.P.) Deep, rosy-pink, large double blooms with spicy fragrance. Roses borne on strong upright stems. Vigorous upright grower, and constant bloomer.

PINK FRAU KARL DRUSCHKI (H.P.) Soft pink; very large, full and double. Upright habit.

PREMIER (H.T.) Dark pink flowers of full size, fine form, and pleasing fragrance, borne singly on stiff, thornless stems from a vigorous and robust plant.

RADIANCE (Pink) (H.T.) Rosy carmine reverse of petals, beautiful silver tint, large, full fragrant. Vigorous grower, free bloomer, long, stiff stems. This is one of the best we have seen in the South.

RADIANCE (Red) (H.T.) Just like the pink, except in clear red color with no other shadings. Beautiful in bud and flower.

RADIANCE, SHELL PINK See Mrs. Charles Bell.

ROSE (RUGOSA) A beautiful Japanese rose with somewhat thick leathery foliage. Evergreen in Gulf Coast section. Flowers fragrant pink, large blooms.

SILVER MOON (H.W.) Clear, silvery-white with a mass of bright yellow stamens; free blooming.

SUNBURST (H.T.) Rich coppery-yellow, shading to golden-yellow. Long pointed buds. A dream in intense colorings. Small spreading growth.

Palms

Nothing makes our Southern towns more invitingly tropical, especially in the eyes of our Northern visitors, than the palms, at home in our mild climate. Loftily palms lining an avenue suggest stability and dignity. A careless grouping of palms with other evergreens makes an effect of luxuriance that nothing else can create.

The number of kinds of palms makes variety possible if one fancies a real palm grove. Their broad fan-like leaves afford shade without obstructing the breeze. Planted so that their mature foliage just meets, they make a cool, inviting spot, never marred by fallen leaves.

Our palms grow very stocky in the heavy black land, having strongly developed leaves and large thick, pronounced trunks. More leaves according to caliper than on the palms grown in the more southern sections where development is quick and very tender. The same grades we offer when compared with others we have seen are worth three times as much.

One of our chief specialties is Palms. During our years of experience in handling nursery grown palms from open ground, we have settled on a system of lifting them with a ball of earth (Palms cannot be handled bare-rooted), and from 40 to 60 per cent of the leaves are cut off when dug. Never remove burlap when planting. After new growth starts, fertilize liberally with stable manure and water freely and your Palms will give pleasing results.

Although the palm is tropical, its range is not so limited as some believe. For 150 miles from the coast, Texas and Louisiana may vie with California and Florida in growing palms. Even in Fort Worth and Little Rock some varieties live comfortably with little protection.

METHOD OF MEASURING

Palms are measured and graded by the thickness or diameter of the trunk where it protrudes from the ground.

CANARY DATE PALM

Phoenix canariensis

The Canariensis is the noblest of all the Phoenix family, being one of the most majestic Palms in cultivation. Its long, graceful, swaying leaves often attain a length of from 10 to 15 feet. Hardy 100 miles from the coast. Grown in tubs they are appropriate for indoor decorations, plantings on sidewalks or for decorating stages, etc., and will stand much more abuse than the ordinary decorative (house) palms. Their tall, upright growth, when established makes a very striking effect on lawns.

Canary Date Palms in Parking.

A Palm Framed Vista. Washington Palms are the tall ones. Date Palms, the smaller ones

MEXICAN WASHINGTON PALM

W. gracilis

(*Washingtonia Robusta*)

Named for George Washington, this is the type of Palm which has made California world-wide famous as the "Palm State." Very hardy and vigorous grower, the immense rich, dark green leaves, which never turn yellow, form a beautiful crown to the tall stately trunk which is very sturdy and picturesque. The most beautiful palm for street and avenue planting and for general use on the lawn. In groups it is delightfully effective and its constantly increasing popularity makes it almost assured that the Gulf Coast section for 50 to 100 miles inland will become as thickly planted with palms of this type as the sections of California visited for such beauty. As a specimen for lawn, park or other developed groups we know of no more beautiful palm or other plant than this *classica* Washington.

BLACKBURN PALMETTO PALM

Sabal Blackburniana

Perfectly hardy, standing temperature nearly zero. Large specimens known as far North as Arkansas. Large Fan Leaf variety; native of the Southern coast. A particular feature of this variety being the fact that it holds its green trunk effect.

Caliper	Apxx. Ht.	Each	Ea. per 10

PINDO PALM

Cocos australis

Very graceful, with upright recurving leaves, resembling the Canariensis or Date Palm leaves. Foliage is of an impressive gray-green; fruit edible; erect columnar trunk. A great deal harder than the Phoenix and Washington and can therefore be planted farther North than any other outdoor variety.

Caliper	Apxx. Ht.	Each	Ea. per 10

Arizona Ash Two Years From Planting.

Shade and Ornamental Trees

We have listed the best medium and large growing trees suitable for shade and street planting.

Ash

ARIZONA ASH

Each year the popularity of this tree increases remarkably. Of medium size for either street or lawn purposes. Clean growth, no leaf littered lawn during late summer and early autumn. Trunk very straight, covered with grayish-white smooth bark. Foliage dark green, very glossy. Remains on tree until coldest freezing weather. First to put out young leaves in spring. Recommended for extensive planting in Gulf States. A rapid grower and one of the few trees beautiful immediately after planting. Safe for coastal plantings where salt water spray and occasional inundations. El Paso has adopted this tree as the universal street tree.

Oak

Quercus

For large lawns and wide parkings no better trees can be recommended. After attaining several inches caliper they grow quite fast, contrary to the usual idea. Due to the heavy black land in which they are grown and the six foot spacings allowed the larger trees, we can dig the largest sizes with fine balls.

LIVE OAK

Most picturesque, popular shade and avenue tree for the South with small sized spiny-toothed glossy, rich green foliage. Very clean growing. Comparatively rapid grower after first few years and the small trees are exceptionally beautiful.

	Caliper	Appx. Ht.	Each	Ea. per 10

NB		8 to 10 ft....	2.00	1.50
NB		6 to 8 ft....	1.50	1.25

Poplar

Populus

P. nigra

In landscape work few trees have the value of Lombardy Poplars for quick effects. They show up the first season and give skyline and background long before any other variety can be grown to any considerable height. We have ideal conditions for the production of these trees and they make stocky trunks, are thickly branched, and unusually strong and vigorous. Balled trees will make remarkable growth the first year. Also known as Italian poplar, it is used to get the effect similar to that secured by Italian cypress, but at much less expense. Lombardy poplars require little space. Especially good for lining drives and for narrow lanes and streets. This is the tree so highly admired by American tourists in Europe. Perfectly adapted to this country and every landscape architect depends upon the Lombardy poplar for the high points in the background along the alleys, or property lines.

	Caliper	Appx. Ht.	Each	Ea. per 10

NB		5 to 6 ft....	.75	.60

CHINESE POPLAR

Like Lombardy in having a pyramidal or a columnar head. The leaf is a medium green, red veined, and smaller than Lombardy. This is a good tree for narrow streets. It is useful, too, for contrast with the weeping willow on the margins of pools or lakes where a naturalistic effect is wanted.

Tallow Tree

Sapium Sebiferum

Chinese is the name by which this tree is more generally known. The tallow is the cleanest of deciduous trees as the leaves are not continually falling. Plant tallows and you will not have to rake leaves until late in the fall. It is early in leaf in the spring; in fact is almost an evergreen with us. Compact dense head of small bright green leaves. A beautiful shade tree and very desirable for streets or avenues, anywhere in the South. Late fall, when so many trees have yellow and brown falling leaves, the Tallow tree is beautifully green. Frost turns leaves maple shade.

Pecans

Hicoria Pecan

Free, Special Book on Pecans—Bulletin No. 66. A special book of 32 pages devoted entirely to the growing and marketing of Pecans. Write for it.

Governor Hogg selected this tree to mark his grave.

Pecans for Home Planting

CULTIVATE WELL AND GET RESULTS

If you want the best results it is imperative that you fertilize, spray and cultivate your trees well.

Grafting is a mystery to many people. Briefly explained, Pecan nuts do not come true from seed. Vigorous growing seed are planted and branches of trees of a known variety are grafted on the seedling roots. It is then assured that the tree will bear nuts like its parent.

The A. & M. College Extension Service pecan experts say that the West Texas varieties are not at all adapted to East Texas or other states east. Coast varieties, however, may be grown in West Texas.

All for the cost of a few trees and the keeping of the waste spaces cleaned and in order, as they should be on well-kept farms. Pecans are a safe investment.

The growing of the improved varieties of Paper Shell Pecans gradually developed until it has become one of the South's most important agricultural pursuits.

Trees should be planted at a distance of 40x60 feet apart, requiring 18 trees per acre. At this distance other crops may be successfully and profitably cultivated between the rows of pecans without detriment or injury to the trees. The cultivation of other crops actually benefits the pecan trees and reduces the expense of upkeep to a minimum.

A sure, safe and substantial income for the young or middleaged man or woman can be more quickly established in pecan growing than any other business in which they may engage.

BRADLEY The "Bradley" has taken every prize where shown on account of richness of meat. You will make no mistake in planting this variety exclusively.

Sycamore

Platanus Orientalis

A hardy rapid grower with large maple-like green foliage. Grows symmetrical and uniform, making a dense shade.

	Height	Each	Ea. per 10
NB	6 to 8 ft.....	\$2.00	\$1.75
NB	5 to 6 ft.....	1.50	1.25

NB	5 to 6 ft.....	1.00	.75

Weeping Willow

Salix Babylonica

Weeping willows have for centuries been symbols of romance. They grow fast and lend themselves nicely to groupings as backgrounds for flower garden or lawn. Near pools or overhanging streams or ponds, they are at their best, from an artistic point of view, but they thrive in a wide variety of conditions.

Shell thin, easily cracked, permitting kernels to be removed whole. No corky substance; kernel plump, rich, sweet, very heavy, quality best. Forty-five to fifty nuts per pound. Tree of limber growth withstanding gales without shedding nuts or breaking limbs. Comes into bearing younger and more prolific than most other varieties. The parent Bradley Pecan tree, growing at Macclenny, Florida, bore the sixth year from seed, and has borne annual crops ranging from 200 to 300 pounds.

BIG "Z" We are the exclusive propagators of the Big "Z" Pecan, which promises to be the peer of all varieties. The Big "Z" has in the past borne twice as many nuts as any of the old standard varieties in the same grove. It is the only large nut we have observed which fills regularly. The size averages 38 to 40 to the pound. Shell thin, partitions thin, appearance fine, kernel rich, yellow, crisp, and of fine flavor. Best cracking qualities of any large nut. Very early and prolific bearer.

FROTSCHER PECAN One of the oldest and best known varieties; attractive in appearance; remarkably thin shell; splendid cracking qualities.

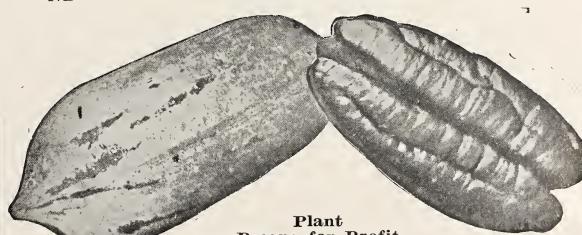

MONEY MAKER PECAN One of the best early varieties. It combines early maturity and heavy production. Nuts uniform in size.

SCHLEY PECAN Thrifty, strong, symmetrical grower; kernel plump; superior in quality, richness, flavor and appearance.

STUART PECAN Symmetrical growth, regular bearer; uniform size and shape; large and plump; well filled.

SUCCESS PECAN Size large to very large; shell moderately thin; kernel usually plump; quality rich; flavor very good.

Plant
Pecans for Profit

Fruit Department

The Celestial Fig is also Ornamental.

Grapes

BUNCH GRAPES

Not all bunch grapes are at home in the South but many grow here to perfection. The best trellis is the Munson three-wire trellis consisting of posts with cross-bars at top with three wires strung over tops for vine support. This type is usually planted 8 to 10 feet apart. Prune each winter.

CARMAN GRAPE Vigorous, free from disease; prolific, large cluster. Berry medium size, black, firm, tender, fine quality. Very rich, superior flavor, seeds easily leaving pulp. A very popular standard variety for the Gulf Coast and general South.

CONCORD GRAPE an old favorite. Berries very large, round, blue-black; flesh pulpy, sweet; quality good. Very early.

MUSCADINE CLASS

The Southern Muscadine class of grapes is native to the South and is well known and loved by all Southern people. Flavor is excellent. Usually trained on overhead arbors. Pruning is not commonly practiced.

FLOWERS—Large, splendid, quality. Very late. Black. **JAMES**—Very large, purplish black. Rich, sweet, juicy. **MEISCH**—New variety; medium size, earliest of this type. Delicate, rich, splendid flavor.

THOMAS—Small cluster, medium size, red. Very fine quality.

MALE MUSCADINE GRAPE. If planted with other varieties of Muscadine Grapes, it will cause them to bear much heavier crops as this is a pollinating variety.

WHITE SCUPERNONG GRAPE. Large, bronze colored berry. Flesh sweet, pulpy and vinous. Vines produce abundantly.

	Height	Each	Ea. per 10

NB	No. 2 1 and 2 yr.....	.25	.20

Figs

BRUNSWICK (In some localities called Jennings). Fruit very large and regular in outline; color dark violet, skin thin with firm texture for a fig; flesh white just under the skin, shading to beautiful pink around seed cells. Juicy and rich; quality excellent; most reliable bearer and very prolific. Tree strong grower, and if planted in fertile soil and given good care will mature fruit first season after planting.

CELESTIAL The fruit is medium to small; color bluish to ivory-yellow; flesh rich and tender, very sweet—so tender that you can eat, can or preserve them without peeling. Generally considered the business fig in rolling or sandy lands and in sections where an exceptionally hardy variety is desired. Should be grown in tree form. On account of its extreme sweetness, this is frequently called the Little Sugar fig. The meat is firm and rosy.

GREEN ISCHIA Color when ripe light transparent green; flesh white shading to crimson around seed cells. Size medium to large. Tree strong, upright growth, very prolific, commences bearing young. Next to Celestial in point of hardiness. The Green Ischia is a very valuable variety in home plantings and where the crop is to be disposed of to the local markets. It is quite late and extends the marketing period over a long time.

KADOTA Several years ago, for the fruit lover and home orchardist, we obtained a very limited quantity of Kadota figs from a grower of wide reputation who recommended them most highly and advocated their planting here. We propagated them and have found that this variety has some highly desirable characteristics and is well adapted to this section. Fine for preparing "candied" figs and dried fruit. The original grower's description follows: This fig was sent into California by the United States Department of Agriculture some years ago and is by all odds the most popular fig here today. It is a yellowish color when ripe, medium size, very sweet and seals up at the end excluding dirt and insects.

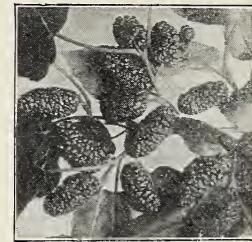

YELLOW NECHES Resembles Celestial, only fruit yellow.

Grow Your Own Fruit

A small assortment of fruit trees can find room on even a small lot, and will provide a continuous supply if the varieties are wisely chosen.

Our fruit trees are cheap and easily raised as they have been properly cared for during their early growth.

Merritt Mulberries

Mulberries

Morus

For shade in backyards or lots and in poultry runs, the mulberry is the best tree we know. The fruit will feed chickens or pigs for months. Mulberry trees thrive in any location.

BLACK ENGLISH A very prolific bearer; ripens early. A fine variety to start your rotation with other kinds, providing poultry and hog feed for four or five months.

HICKS EVERBEARING

MERRITT Finest Mulberry. The earliest variety: berries very large and full. Ripens during April and May. No farm complete without some Merritt Mulberries. A place in every home yard for this tree.

NEW AMERICAN A vigorous grower, with fine large leaves and producing large black fruit.

RUSSIAN

Long season, everbearing; small size.

STUBBS

A well-known good variety.

	Height	Each	Ea. per 10

NB	5 to 6 ft.....	.35	.25
NB	3 to 4 ft.....	.25	.20

Pears

Pyrus

Because of the blight the list of adapted pears for the South is limited. Ours are from "Blight Proof" strains and are highly resistant to this disease. Pears bring fancy market prices in both local and distant markets. Some of our friends found them their most profitable crop this year. A few trees will add considerably to your income. An orchard well cared for, will pay profitably.

PINEAPPLE (SAND) An excellent preserving pear. When cooked holds its white color. Very large, juicy, good shipper. Known for its resistance to blight.

	Height	Each	Ea. per 10
NB	8 to 10 ft.....	\$2.50	\$.20
NB	6 to 8 ft.....	1.75	1.50
NB	5 to 6 ft.....	1.25	1.00

Japanese Persimmon

(*Diospyrus*)

Are destined to become one of the leading fruits of the cotton belt and lower South. This may seem an extravagant statement, but as soon as there is enough of this fruit on the market for the people to learn the richness and deliciousness, the demand will increase far in excess of the supply. Where the Persimmon is known on the market it finds ready sale. In Japan the Persimmon is to the Japanese what the apple is to the American. The cost of cultivation, care, and production, is reduced to a minimum. The trees thrive on almost any soil, giving good results on land too poor for most crops. No frost risk and very few diseases or insect troubles.

POLLINATING THE PERSIMMON

It is a well known fact that many of the best known varieties of persimmons drop a great deal of their bloom and immature fruit and it has always been suspected that such varieties produced mostly imperfect or pistillate flowers. Growers in Florida now claim to have discovered a variety that always produces an abundance of staminate flowers. This is known as the Gailey Persimmon. The following statement is made about it by its introducers:

"It is not recommended for its fruit, for, though it is good, it is small, but it is introduced to be planted along with other varieties to supply their flowers with pollen and insure crops of fruit. One tree of Gailey should be planted with every seven or eight others."

GAILEY. The pollinating variety to be planted among other varieties; one to every seven or eight is recommended.

HACHEYA Very large, oblong. Conical with rounded point. Reddish-yellow. Tree vigorous and attractive. One of the best for general planting.

HYAKUME Large to very large, varying from roundish-oblong to roundish-oblance flattened at the ends; skin light bluish-yellow; flesh light brown; sweet, crisp, and meaty even while hard. A splendid persimmon.

TANE NASHI The best known and most popular variety in general. Quite large, conical, pointed, smooth, and symmetrical. Early bearer, early ripening and productive.

TRIUMPH Yellowish-red, bright smooth skin, tomato shape, handsome and showy. Flesh yellow, firm, fine grained, and of very fine quality. Makes showy package for market. Good shipper. The choicest of all varieties.

YEMON Large, tomato-shape; somewhat foursided; skin bright orange-yellow; flesh yellowish; generally seedless; quality good.

NB 2 to 3 ft.....	.50	.40

A Griffing Grown Tree, Shrub or Plant will please the most critical buyer and Griffing's Balling Soil assures you that it goes in the ground in good condition.

Griffing's Balling Soil almost insures the growth of our trees and plants.

Plums

(*Prunus species*)

Coast varieties of plums are becoming more widely planted.

Recent crops of plums have shown the people of South Texas and Louisiana that there is no better section for their extensive production. The fruit is delicious and brings high market prices.

Plums on Marianna Plum Root.

BURBANK Very large, clear rich red, showing yellow dots. Flesh deep yellow, firm and meaty. Ripens first of July.

EXCELSIOR Remarkably strong grower, fruit medium to large size; reddish purple; flesh firm, yellowish. A most valuable Southern plum. A cross between the large Japanese varieties and native Southern plum, giving it large size and assurance of adaptability. Ripens in May.

HAPPINESS Very large, glowing red; flesh firm, rich, juicy; exquisite flavor. A very profitable plum. June 10th to 20th.

MCCARTNEY Very early, oblong, transparent-yellow; strong grower, productive. The largest and most reliable yellow plum for planting in lower South.

	Each	Ea. per 10
NB 4 to 6 ft.....	\$1.00	\$.80
NB 3 to 4 ft.....	.75	.60
NB 2 to 3 ft.....	.50	.40

Peaches

(*Amygdalis persica*)

Every home garden should contain peach and other fruit trees.

The leading fruit of the South—Viewed from either the standpoint of the commercial orchardist, the farmer or for the home—the Peach ranks first. If the right varieties are selected for the locality it succeeds over a wider range of territory.

HOME AND LOCAL MARKETS. Every farmer and every home owner with space for a few trees should first plant for the home, and if space will permit, enough for local markets. No fruit is more healthful, no fruit will afford so much pleasure and profit for a small outlay.

Peaches on Peach or Marianna Plum Root.

ANGEL Freestone, large, round, flesh-white; melting, juicy, rich with acid flavor. June 20th to July 5th.

ELBERTA Best known commercial variety. Very large, rich, yellow, red cheeks. Good shipper. Freestone.

HALL'S YELLOW Large, nearly round; yellow washed red. Flesh yellow, firm, good quality. Freestone. June.

HONEY Freestone. Creamy-white, tinted red. Sweet, June 5th.

IMPERIAL Very large oblong, whitish-yellow, washed red. Flesh white, sweet. One of the best for the Gulf section. Freestone. June 25th.

JEWELL Medium size, roundish oblong, small point, light yellow, juicy. Freestone. May 15th to 30th.

PALLAS Freestone. June 20th. Deep red, flesh white.

	Each	Ea. per 10

for which I am enclosing remittance adding 20% for insurance. My check
for \$..... including insurance premium.

It is my understanding that you are to send me policy insuring me against loss of this stock from any natural causes for one year.

Signed.

Improved Satsuma Oranges

Citrus Fruits

Citrus Aurantium

For the black waxy soils and stiff clay or flatwoods lands of Texas and Louisiana, Citrus should be budded on the *Citrus Trifoliata* stock.

Satsuma Improved

Oonshiu

Bud selected. We have been keeping close record on various Satsuma trees, and have found a great difference in the so-called "Satsuma." We propagate ours from this strain we have selected as having much superior quality, identified as Oonshiu.

The early market Orange for the Coast sections. Hardest Oranges known. On *Citrus Trifoliata* root, Satsumas are being grown commercially as far north as DeRidder, La. Begins bearing the second year. Fruit medium size, flattened; color deep orange; flesh fine grained, tender, juicy, sweet and delicious. Orange entirely seedless. Tree thornless.

Round Oranges

LUE ORANGE A new late Orange claimed by its introducers to be the best late Orange known. Trees are hardy, thrifty growers. Fruit is large, well shaped. Color golden orange or orange-red. Skin smooth; flesh deep orange, very juicy and free from "rag." Flavor is rich, sub-acid and sweet. Seedless or very nearly so.

WASHINGTON NAVEL Ranks first in quality and prolificness of the Navel Oranges. Size large, meaty, tender, sweet and highly flavored. The famous California Orange.

VALENCIA Best late California Orange. Called "Sun-kist." A very late and prolific orange of exceptionally good quality. Fruit large size, oval or rounded in shape; juicy, sweet and tender and of exceptional flavor. In Florida it produces an orange superior to the fruit produced in California.

Lemons

Citrus Limona

MYERS LEMON A new variety introduced by U. S. Government. Hardy and better than ordinary commercial lemons.

Grapefruit

C. Grandis

MARSH SEEDLESS GRAPEFRUIT This is the best and most satisfactory variety as it has a mild, sweet flavor most people prefer.

Kumquats

Or Kinkan Orange

MEIWA Sweetest, round. Best for eating purposes Thornless.

Notice the price of Kumquats double other Citrus Fruits.

Citrus trees should be low branched to bank dirt among the limbs during the winter months and to shade the body when frost is in it. (Sun splits the bark).

Our low branched trees are sold according to "Caliper size just above the bud."

All citrus is budded on citrus trifoliata except varieties and grades noted below.

	Caliper	Appx. Ht.	Each	Ea. per 10
B&B	1 1/2 to 2 in.	5 to 6 ft...	\$6.00	\$5.00
B&B	1 1/4 to 1 1/2 in.	4 1/2 to 5 ft...	5.00	4.00
B&B	1 to 1 1/4 in.	4 to 4 1/2 ft...	4.25	3.50
B&B	7/8 to 1 in.	3 1/2 to 4 ft...	3.50	3.00
B&B	3/4 to 7/8 in.	3 to 3 1/2 ft...	3.00	2.50
B&B	5/8 to 3/4 in.	2 1/2 to 3 ft...	2.50	2.00
B&B	1/2 to 5/8 in.	2 to 2 1/2 ft...	2.00	1.50
NB	1 to 1 1/4 in.	4 to 4 1/2 ft...	2.50	2.00
NB	7/8 to 1 in.	3 1/2 to 4 ft...	2.00	1.50
NB	3/4 to 7/8 in.	3 to 3 1/2 ft...	1.50	1.25
NB	5/8 to 3/4 in.	2 1/2 to 3 ft...	1.25	1.00
NB	1/2 to 5/8 in.	2 to 2 1/2 ft...	1.00	.75

Prices of staked trained Citrus Trees:

Height	Each	Ea. per 10
NB 2 1/2 to 3 ft.....	1.00	.75
NB 2 to 2 1/2 ft.....	.75	.50
NB 18 to 24 in.....	.50	.40
NB 12 to 18 in.....	.40	.30

Bearing Size Satsumas.

We have about 200 large orchard trees we want to move to make room for new plantings.

B&B 6 yr. fruiting	3 to 4 in. cal.....	\$25.00
B&B 5 yr. fruiting	2 1/2 to 3 in. cal.....	17.75
B&B 4 yr. fruiting	1 1/2 to 2 in. cal.....	14.75

GRAPEFRUIT AND ORANGES

Budded on sour Orange roots

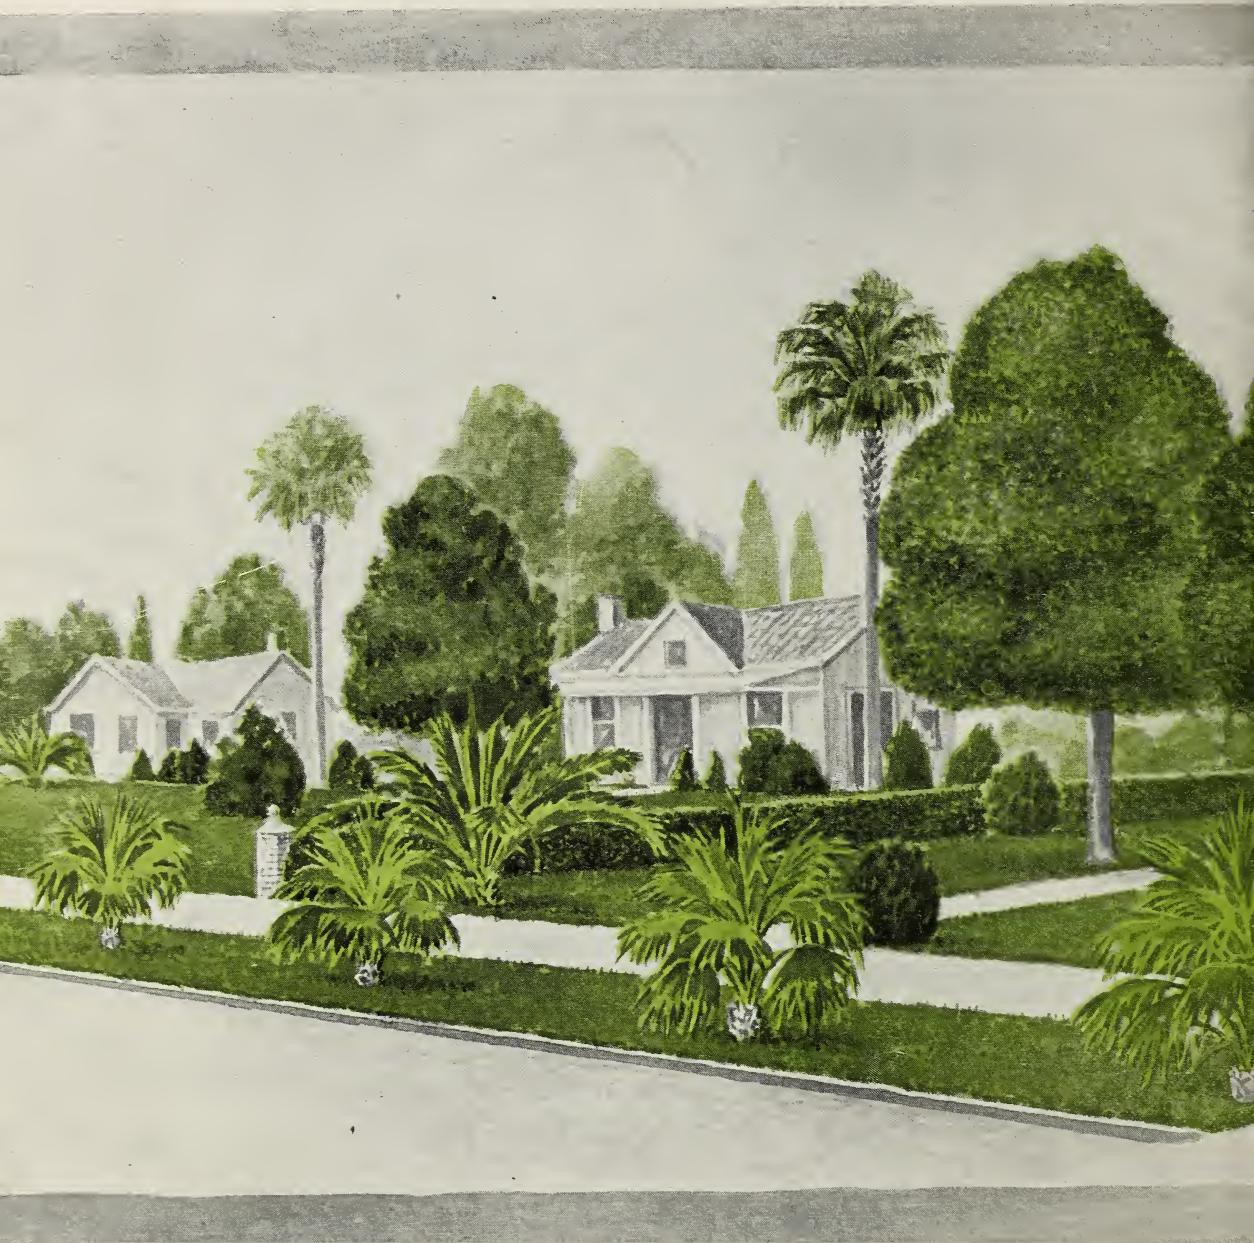

For Delta lands along the lower Mississippi and Rio Grande Rivers, and deep muck or deep sandy soil, oranges should be budded on the Florida Sour Orange stock.

This year, we are growing budded on Sour Orange root, the following varieties in sizes from $\frac{3}{4}$ inch up only:

MARSH SEEDLESS GRAPEFRUIT
SATSUMA ORANGE
LUE GIM GONG ORANGE
VALENCIA ORANGE
WASHINGTON NAVEL ORANGE
